

Three-dimensional analysis: Continuing progress through international collaboration Carolyn F. Small, Michael W. Whittle	v -- vi
The measurement of human motion: A comparison of commercially available systems James G. Richards	589 -- 602
A three-dimensional approach to the calculation of foot clearance during locomotion Jill K. Startzell, Peter R. Cavanagh	603 -- 611
On the estimation of knee joint kinematics F. Marin, J. Allain, A. Diop, N. Maurel, M. Simondi, F. Lavaste	613 -- 626
On skin movement artefact-resonant frequencies of skin markers attached to the leg Dan Karlsson, Roy Tranberg	627 -- 635
Comparing methods of estimating the total body centre of mass in three-dimensions in normal and pathological gaits M.H.A. Eames, A. Cosgrove, R. Baker	637 -- 646
Multivision determination of the volume of human body segments and implementation of a dynamic model J.Y. Ertaud, X. Savatier, W. Schmidt, J.M. Thomine, F.H. Dujardin	647 -- 654
A new approach to determine the hip rotation profile from clinical gait analysis data Richard Baker, Laura Finney, John Orr	655 -- 667
Critical kinematic events occurring in the trunk during walking Celeste Sartor, Gordon Alderink, Heather Greenwald, Lisa Elders	669 -- 679
Three-dimensional relationships between the movements of the pelvis and lumbar spine during normal gait Michael W. Whittle, David Levine	681 -- 692
The kinetic and kinematic effects of increasing load carriage upon the lower limb David C. Tilbury-Davis, Robin H. Hooper	693 -- 700
Gait assessment in unicompartmental knee arthroplasty patients: Principal component modelling of gait waveforms and clinical status Kevin J. Deluzio, Urs P. Wyss, Patrick A. Costigan, Charles Sorbie, Benny Zee	701 -- 711
Optoelectronic analysis of the Cotrel-Dubousset instrumentation C. Lecire Lilloni, W. Skalli, R. Zeller, J. Dubousset, F. Lavaste	713 -- 724
The dynamics of quasi-static posture control C.C. Chow, M. Lauk, J.J. Collins	725 -- 740
