ESC 115 Physical Geology

The Geology of Dubuque

Find a partner for the following exercise. It will help prepare you for the first test and will require you to improve your internet skills.

Your task is to prepare a guide for the City of Dubuque that addresses the following:

- Why someone would want to visit Dubuque;
- How to get to Dubuque from Chicago, Minneapolis, Davenport, and Des Moines;
- Where to stay while here;
- What the geologic and human history of the area is; and
- What geologic sites to see.

You may include as many figures as you wish plus links to web sites. However, if you use someone else's figure, it must be clearly labeled with its source. You should email me your document. (Word, Powerpoint, or other formats are all fine.)
