

PROPOSED MARYLAND LICENSE PLATE

The picture displayed above is a proposed example of what the Maryland LSU license plate will look like. Again, this is just a tentative rough draft, just to give everyone a general idea. Also, the final design **MUST** be approved by **BOTH** Louisiana State University **AND** the Maryland Motor Vehicles Administration (MVA). So, there is a remote possibility that the proposed example above may not be what gets approved and issued.

The goal is to develop a license plate that most symbolizes, distinctly identifies, and is synonymous with LSU. Especially with the logo, like the one displayed in the picture. It should be one that if anyone drives or walks by and sees the license plate, they can automatically tell that it is an LSU plate just by looking at the logo without having to read the name of our school. If you know of a better logo that should be used, feel free to send an e-mail message to Norm Marcocci at: NormLSU88@yahoo.com .

Whatever the approved final design is, the logo will be flushed to the left, with the license plate number following to the immediate right. As shown in the picture, the license plate will feature a logo in the colors of purple and gold. Additionally, underneath the logo, the words "GEAUX TIGERS!" will appear in purple. The words, "LSU Alumni Association" will appear at the bottom. As for the rest of the license plates colors, the background must remain white. Additionally, the words "Maryland" and "Louisiana State University", the license plate number, and the three-letter organizational abbreviation of "LSU" between the logo and license plate number will have to appear in black. Please note that personalized license plates are not available in Maryland.
