

Petition to approve requested modifications at 2121 Garden St.

We the undersigned enthusiastically approve the requested modifications located at 2121 Garden St. in Santa Barbara, Ca.

The height of the stone wall at the columns, pier lanterns, and door and wall adjacent to neighbors wall does not pose any safety hazards and fits into the overall scheme of the historic neighborhood.

The basin surrounding the existing fountain does not pose any safety hazards and is aesthetically pleasing and in correct proportion to the fountain.

The materials, proportions, and overall landscape design is done in excellent taste and is a benefit to the neighborhood.
