

Flag Project

Can you figure out the Fractional part, Decimal part and Percent part that each color represents in a Color Tile Flag?

- Use color tiles to make a rectangular design for your Flag.
- Make your Flag by using as many colors as you like.
- Create your Flag using grid paper, color accordingly and mount onto construction paper.
- For each Flag, make a table to record the Fraction, Decimal and Percent represented by each color in your Flag.
- Be ready to explain how you found your Fractions, Decimals and Percents.
- My teacher will require at least ____ colors included in the project. For additional credit, you may add 2 more colors.
- For full credit, you must show all work on the table and submit with your final product.
- This project is due on _____.
