Do you agree to my title of this scientific work paper?. If not I will explained in details just for you but without underestimated to peoples who you think not same just like you in color and also wide-closed on eyes. Possibly that man in this earth more than one species or two or maybe less than 10 if you count. How many exact of numbers of species of human?, the answer is depend on this scientific work paper that you will gived approval, how many, hundreds I think. How, to defined exact the numbers of species of human?, begin now we together count; 1. Japanesse, 2 Indian, 3. Red skin-Indian, 4. Arabian, 5. Western, 6. Papua Nuginian, 7. African, 8. Indonesia-Malayan, 9. Eskimo man 10. Aborigin, 11. Hawaiian, 12. Mongolian, 13. Chinesse, 14. Vietnam man, 15. Latino American, 16. what else-next you mentioned. So at least 16 species will make you wide-open in thinking and decided its true all is new species in human-matter. We think, now maybe, all of human in region-stayed as human is ras, we think all is only group, not as species. All of human in region-stayed will gave name as new species in term as variety in color and wide-closed on eyes, those are:

1. Japanesse (Japan peoples, yellow skin color, etc) is *Japancoloryw matahalf AN*
