

**Parakeet Bird Is Mix Species, The Bird-Parakeet From Parakeet Hisself And Others Of Birds
The Unusual Theory But Accept And Becoming Common Sense By Do Peoples, The Researchers Know And Feel
Empty In Heart And Mind And Hide Always By Do Silent,
Researchers Lie Or They Doing Stupid Matters,
The Theory Of Lock And Key In Evolution Field Should Redetermined**

Author: Atep Nurdjaman, DR™

*Researcher-Independent for revealed unarranged theory in fields of organic chemistry and biology, 2007 in month of February and the date 17
in do doing for title up*

As mentioned in previous scientific work paper publication (see in detail in ref. 1 and ref.2 and also ref. 3) who talk about the mix species, for examples: the new fly, Lutung red-orange color, and the Pongo sp. (Orang Utan), now I talk about Parakeet bird who shown in similar just like I tell before, the new fly, Lutung red-orange color, and the Pongo sp. (Orang Utan). Parakeet bird is bird who shown color in density, mix, and also undefined coming from where that color, its not make sense the bird has color in density just like Parakeet bird, if not coming from post major nature forces. The genetic code should considering every time we deal with animal or others who shown as mix species, the density is our benefit, we never felt sorry after we found the truth, we should guard for any result who shown in genetic as vary-in as library only not maked, and we are only as observer not as recommender, some case maybe OK in case in plant only. Natural selection will produce the balance in nature we should not disrupt for any situation, we are not want to get bad-worst result because any action that coming from us. The fact that Parakeet bird is one of animals who shown remarkable in color is that true, the producing I color maked by human is that true, the get money from that is that true, how should I do, I only observer, I am only researcher, we deal with experiment who maybe shown the reasonable in explanation, we are bad, maybe if we disrupt the balancing of nature. THE FACT, is fact, in nature already happen the mix species, i only discuss considering of them, not disrupt the balancing of them, you maybe, I will kill you with words. Back to earth meanwhile still discuss the air animals, that is Parakeet bird, my guest based on research that the vary in color of Parakeet bird is coming from the others of bird who has color in density, the result definitely shown just like we see, those are, Parakeet bird in color of blue, Parakeet bird in color of yellow, Parakeet bird in color of white, Parakeet bird in color of grey, and others, and off course with level of high-low pixel in color each. The fact that Parakeet bird is mix species is that true, the fact that theres theory considering the "coitus matters" that call as theory of Lock And Key is that true, the fact that Parakeet bird as mix species against the theory of Lock And Key is that true, how should I do, just announce. Now I like to announce that theory of Lock And Key is not true, the best ways for explain is by do that, see my theory below,:

**SPECIES IS COMING FROM ANYWHERE AS LONG AS COMING FROM LIVING FROM WHO MATCH IN GENETIC CODE
AND THE STORY FORMED OF SPECIES NOT BASED ON COMMON BREED ONLY (Atep Nurdjaman, DR™, 2007)**

Based on theory aboved, the species formed not only from same species but also from the other species, the key important is as long as formed the species is has to be has meaning that individual success continued the life for got benefit in future for that individual. This theory also manage what researchers has done finish considering the clone of living form, the clone is unnatural act for examples of that theory, meanwhile the natural result based on the theory aboved is has to be done given result by do examples who exist in the new fly, Lutung red-orange color, and the Pongo sp. (Orang Utan), and also Parakeet bird. Please remember my theory, you will feel sorry if you not do, someday you will found the barrier who cannot make you step away the problem and hide for your benefit, the researchers who know and hide is researcher who shown bad in scientific attitude.

Keywords: Lock and key, Parakeet Bird

Introduction

See abstract aboved and treat as New Theory coming from Atep Nurdjaman, DR™, the theories is:

1. **MIX SPECIES THEORY AGAINST THE THEORY OF LOCK AND KEY IN EVOLUTION FIELD (Atep Nurdjaman, DR™, 2007)**
2. **SPECIES IS COMING FROM ANYWHERE AS LONG AS COMING FROM LIVING FROM WHO MATCH IN GENETIC CODE AND THE STORY FORMED OF SPECIES NOT BASED ON COMMON BREED ONLY (Atep Nurdjaman, DR™, 2007)**

THE FACT AND FEAR AND ALSO THE HARD TO SAY FOR REVEALED THE SECRET BASED ON WHATME-MYSELF(ATEP NURDJAMAN, DR™) INTRODUCE, should say as New Theory without in me attempt to make someone angry and shy.
