AN Is Initial Name For Atep Nurdjaman™

Author:

**ASEP GIMAN¹, GJ-R. EXCELLENT. PROF. PROFESSOR₂. PROF.₄. DR (Doctor)TM. Dr. ATEP NURDJAMAN, PhD. NOBEL₆
(NOBEL LAUREATE). MBA₂. BSc. SSI²**

¹ Teacher of **SMPN 2 Soreang** in Soreang City, Bandung Prefecture in West Java, Indonesia

² Researcher at **ATEP NURDJAMAN THE RAN™ INSTITUTE INTL.** in Bandung City, in West Java, Indonesia, and also Researcher-Independent for
revealed unarranged theory in fields of organic chemistry and biology,
For to do research and result has been wrote in 2008 in month of February and the date 03 in do doing for title up

CONSIDERING NEW FOUND AS CONTINUING RESEARCH ABOUT MIX INSECT SPECIES, NEW FLY, BEGIN NOW.....WE PUT
THE ALL OF CONTENTS OF PREVIOUS SCIENTIFIC WORK PAPER WHO HAS TITLE..... New Family In Insect
World: Two Of New Fly, Born As Mix Insect Species:-Definitely Different Each of Others, The Members Of Each, :
AtepN NadykoesrenataJonitaAncorrfamara AN, SNAtepNurdjaman LoveHthreenextMooreBritalemodelsBlesscha AN
(ATEP NURDJAMAN, PROF. DRTM).....

.....WHO MENTIONED THE FOUND OF NEW FLY, THIS EXPLANATION AS BASIC
FUNDAMENTAL FOR ALL OF NEW FOUND CONSIDERING NEW FLY. AFTER THIS EXPLANATION WILL CONTINUED TO
EXPLANATION OF NEW FOUND WHO IS NEW FLY, HERE DETAILS.....

Have you ever found new fly in your house?, I have been found. The feature just like common fly especially head, but legs is not
shown just like common fly, and also theres additional apparatus on back of fly and my guest is for control speed of fly. So far I
have no found fly in color beside black. The speed of fly un common, theres no high speed when fly, look like domestication of fly
has been given the result the changing of everything, especially shape and color and also eyes, I doubt if eyes contain in density
of lens. I believe that the new fly is mix insect species especially considering the legs who shown not common in feature just like
common fly, sometimes I found legs with gloves, sometimes no. The interesting shape of this new fly is the additional apparatus
in back of fly who shown specific in appearing in do shape different to each of others. Sometimes I found the apparatus shown as
curve sharpened-triangle and sometimes no. I found the different in additional apparatus and I believe that the different same as
value to define the family level, so when I found two of kinds of new fly has meaning I found two family of new fly. Above, I
described the different between one individual and others of individual who I think vary in the shape of different. I found new fly
and I gave name AtepN NadykoesrenataJonitaAncorrfamara AN and SNAtepNurdjaman LoveHthreenextMooreBritalemodelsBlesscha AN, each of both include in each of family name is Adamwahidae and Suparmanidae

Keywords: :New fly, apparatus on back, mix insect species, family, Adamwahidae, Suparmanidae, AtepN NadykoesrenataJonitaAncorrfamara AN, SNAtepNurdjaman LoveHthreenextMooreBritalemodelsBlesscha AN

Introduction

In years 2005, I found the new insect in Bandung, INDONESIA COUNTRY, this insect shown the different when compared to common fly,
as you see and your judgment will make better in term the specific different, I am not expert to describe the feature of insect but I know the
different, please observe the picture below who shown the different based on my perspective and also you in each mind, :

Picture 1. ::The New fly, both is *AtepN NadykoesrenataJonitaAncorrfamara* AN who has additional apparatus for control speed when fly who shown as curve sharped-triangle, this new species I put in family of Adamwahifam. I found also the other, the name is *SNatepNurdjaman LoveHthreenextMooreBritalemodelsBlesscha* AN who has additional apparatus for control speed in shape of triangle of flag and I put this species in family of Suparmanfam

As you see aboved, my perspective and your perspective could be maybe same just like I told before that both of fly is different with common fly, any suggest who appears as reflection the different of perspective I will considering the discuss in future. Thank you very much for trust me-myself(Atep Nurdjaman, DR™) to believe that my short explanation very valuable considering the new fly who shown in two family, and next someday I will tell the rest of numbers of family;3 more.

Below here is my New Finding considering the NEW FLY, see in details in picture and also please compared the different of NEW FLY with two of PREVIOUS NEW FLY,

The different are:

1. Apparatus on back of fly (the shape is stream curve, not just like on previous new fly, please compared the picture of New Fly with previous of New Fly aboved)
2. The legs without gloves (compared), see the others

Because the New Fly has been identified as fly who shown different with the others of previous of New Fly, so now in this scientific work paper I publish the NEW FLY who give the name by me-myself(ATEP NURDJAMAN, PROF. DR™) as Cutedaug Duan AN. This new species manage in **family of Kosasihidae**

END OF EXPLANATION FROM PREVIOUS SCIENTIFIC WORK PAPER WHO HAS TITLE..... New Family In Insect World: Two Of New Fly, Born As Mix Insect Species:-Definitely Different Each of Others, The Members Of Each, : AtepN NadykoesrenataJonitaAncorrfamara AN, SNatepNurdjaman LoveHthreenextMooreBritalemodelsBlesscha AN (ATEP NURDJAMAN, PROF. DR™).....AS BASIC FUNDAMENTAL FOR EXPLAIN NEW FOUND.....

THE TITLE OF NEW FINDING OF NEW FLY THAT PUBLISH AS RE-UPDATE THE NUMBERS OF NEW FAMILY IN FLY WORLD, IS

**NEW SPECIES Continuing Finding.....New Family In Insect World: One New Fly,
Born As Mix Insect Species:-Definitely Different Each of Others,
The Member Of New Family, : Triangledelta Sweet AN,
Beside the Establish Naming of Two of Members of New Families,
AtepN NadykoesrenataJonitaAncorrfamara AN,
SNAtepNurdjaman LoveHthreenextMooreBritalemodelsBlesscha AN
Cutedaug Duaan AN**

Highlight for new finding of NEW FLY, are:

1. Triangle perfect in shape of apparatus on back of fly
2. The big dot in color of white in apparatus on back of fly
3. The legs without gloves
4. Additional shape in one of corner of triangle shape the apparatus on back of fly (corner 2)

The name of NEW FLY is: **Triangledelta Sweet AN**

The name of family of NEW FLY is: **family of Trianglidae**

THE TITLE OF NEW FINDING OF NEW FLY THAT PUBLISH AS RE-UPDATE THE NUMBERS OF NEW FAMILY IN FLY WORLD, IS

**NEW SPECIES Continuing Finding.....New Family In Insect World: One New Fly,
Born As Mix Insect Species:-Definitely Different Each of Others,
The Member Of New Family, : Whiteeyes Hairybody AN,
Beside the Establish Naming of Two of Members of New Families,
AtepN NadykoesrenataJonitaAncorrfamara AN,
SNAtepNurdjaman LoveHthreenextMooreBritalemodelsBlesscha AN
Cutedaug Duaan AN
Triangledelta Sweet AN**

Highlight for new finding of NEW FLY, are:

1. The apparatus on back of fly shown the triangle in shape in one side and curve on other in different shape
2. Eyes in white the color
3. The legs without gloves
4. Body color shown the black brownish
5. Soft hair appears on body

The name of NEW FLY is: **Whiteeyes Hairybody AN**

The name of family of NEW FLY is: **famili Gimaniidae**

Note: the part of word of idae on family name coming from word of idea (: explanation shown describe as English in modification for identity of the finding and idea of the founder to become word of idae)
