revealed unarranged theory in fields of organic chemistry and biology,
For to do research and result has been wrote in 2008 in month of February and the date 18 in do doing for title up*

Bacteria easy found in brain, you can also found this bacteria in brain. The difficulty is how to found the bacteria who doing symbiosis with in nerves, and the bacteria who doing symbiosis with in nerves in body. How?, only me-myself(GJ-R. Excellent. Prof. Professor₂. Professor₄. DR (Doctor)TM. Dr. ATEP NURDJAMAN, Ph.D. Nobel₆ (Nobel Laureate). MBA₂. BSc. SSI) who know how to reveal the new symbiosis between one living form and others. Have a nice browse your thinking and my knowledge, you will find what you expected and me-myself(GJ-R. Excellent. Prof. Professor₂. Professor₄. DR (Doctor)TM. Dr. ATEP NURDJAMAN, Ph.D. Nobel₆ (Nobel Laureate). MBA₂. BSc. SSI) only as the pioneer and the first-founder the symbiosis of bacteria and nerves of the living form.

Perhaps you will found what you admire to natural of law, we born carry the bacteria as host or parasites? Or us as host and the bacteria is as partner of our lives.....haha.....definetely. Admire me as the pioneer and the founder aboved in title, you only as the follower (ATEP NURDJAMAN say).
