

Detailed Information for Adjust Position

Factors that will affect your lane position choices.

- Road conditions. (refer to search information)
- Position of other vehicles. (space cushion)
- Your ability to see ahead.
- The likelihood that other users can see you.
- The need to protect your lane.

Lane position may involve compromising space.

- Multiple factors require accurate judgment to determine which factor is the greatest concern.

Crash Fact: In multi-vehicle crashes involving a motorcycle, the car driver was following too closely in 4% of the crashes and committed unsafe/improper use of the lane in 5.5 % of the crashes in 1994.
