## Microsoft Office Excel 2007

Chapter Two: Formulas, Functions, Formatting, and Web Queries

Double Entry Definition Journal

| Key term | Definition | How does this key term relate <br> to your prior experience? |
| :--- | :--- | :--- |
| formula (EX 90) | Calculating the results using a <br> valuable tool | Calculations |
| asterisk (EX 91) | Arithmetic operator that <br> directs Excel to perform the <br> multiplication operation | Multiplying |
| order of operations (EX 92) | Negation, percentages, <br> exponentiations, <br> multiplications, divisions, <br> additions and subtractions; <br> from left to right | Math |
| Point mode (EX 93) | Allows you to select cells for <br> use in a formula by using the <br> mouse | Formulas |
| relative cell references (EX 96) | Cell references | Calculations |
| smart tag indicator (EX 96) | A small purple triangle in a <br> cell to indicate that a smart tag <br> is available | Calculations |
| smart tags (EX 96) | Identify certain actions to take <br> on specific data in workbooks | Calculations |
| arguments (EX 98) | The values that you use with a <br> function | Calculations |
| blank cell (EX 98) | Numerical value of 0 | Calculations |
| AVERAGE function (EX 99) | Sums the numbers in the <br> specified range and then <br> divides the sum by the number <br> of nonzero cells in the range | Calculations |
| Mange Finder (EX 106) | Displays the highest value in a <br> range | Calculations |
| MAX function (EX 101) | Determines the lowest number <br> in the range | Calculations |
| Check which cells are | Calculations |  |

|  | referenced in the formula assigned to the active cell |  |
| :---: | :---: | :---: |
| theme (EX 107) | Predefined set of colors, fonts, chart styles, cell styles, and fill effects that can be applied to an entire workbook | Formatting |
| Accounting Number Format (EX 114) | With a dollar sign to the left of the number, inserts a comma every three positions to the left of the decimal point, and displays numbers to the nearest cent | Formatting Numbers |
| Comma style format (EX 114) | Inserts a comma every three positions to the left of the decimal point and causes numbers to be displayed to the nearest hundredths | Formatting Numbers |
| floating dollar sign (EX 114) | Appears immediately to the left of the first digit with no spaces | Formatting Numbers |
| condition (EX 118) | Made up of two values and a relational operator, is true of false for each cell in the range | Formatting |
| conditional formatting (EX 118) | Formatting that appears only when the value in a cell means the conditions you specify | Formatting |
| best fit (EX 122) | Means that the width of the column will be increased or decreased so the widest entry will fit in the column | Formatting |
| hiding cells (EX 122) | Used to hide data that might not be relevant to a particular report or sensitive data that you do not want others to see | Formatting |
| pixel (EX 122) | Is a dot on the screen that contains a color | Formatting |
| spell checker (EX 127) | Used to check the worksheet for spelling errors | Correcting mistakes |
| landscape orientation (EX 129) | Means the printout is printed across the length of the page | Formatting |
| Normal View (EX 129) | Default view that you have worked in up until this point in the book | Formatting |
| Page Layout View (EX 129) | Allows you to create or modify | Formatting |

|  | a worksheet while viewing <br> how it will look in printed <br> format |  |
| :--- | :--- | :--- |
| portrait orientation (EX 129) | Means the printout is printed <br> across the width of the page | Formatting |
| previewing the worksheet (EX <br> 132) | You see exactly how it will <br> look without generating a <br> printout | Printing |
| debugging (EX 135) | Process of finding and <br> correcting errors in the <br> worksheet | Printing |
| formulas version (EX 135) | Shows the actual formulas <br> entered rather than the <br> resulting values | Printing |
| values version (EX 135) | Shows the results of the <br> formulas you have entered, <br> rather than the actual formulas | Printing |
| Web query (EX 137) | Excel imports the external data <br> in the form of a worksheet | Importing |
| e-mail (EX 142) | Electronic transmission of <br> messages and files to and from <br> other computers using the <br> Internet | Importing |
| function (EX 82, EX 98) | Takes a value or values, <br> performs an operation and <br> returns a result to the cell | Calculations |
| equal sign (EX 91)fixed dollar <br> sign (EX 114)Alerts Excel that you are <br> entering a formula or function <br> and not text; often with spaces <br> between it and the first digit in <br> the far left in the cell | Calculations |  |
