Sections: I - Introduction

## **Chapter 1. Radiation in Radiotherapy**

- 1-1. Introduction
- 1-2. Radiation Quantities and Units
- 1-3. Radiotherapy Beams
- 1-4. Simulation
- 1-5. Treatment Planning
- 1-6. Radiotherapy Goals
- 1-7. Effects of Radiation Treatment
- 1-8. Radiation Oncology Facilities
- 1-9. Quality Assurance
- 1-10. Radiobiology
- 1-11. Historical perspectives - External beam
- 1-12. Historical perspectives - Brachytherapy
- 1-13. Safe Use of Therapeutic Equipment

Sections: II - Equipment

## **Chapter 2. Radiation Generators**

- 2-1. Introduction
- 2-2. Principle of X-ray Production
- 2-3. X-ray Tube
- 2-4. X-ray Circuits
- 2-5. Classification of Generators
- 2-6. Van de Graaff Generator
- 2-7. Linear Accelerator
- 2-8. Betatron
- 2-9. Cyclotron

## Table of Contents

- 2-10. Microtron
- 2-11. Cobalt-60 Isotope Unit
- 2-12. Cesium-137 Isotope Unit
- 2-13. Simulators
- 2-14. Remote Afterloading System

### **Chapter 3. Ionization Measurements**

- 3-1. Introduction
- 3-2. Roentgen
- 3-3. Free-air Ionization Chamber
- 3-4. Practical Ionization Chamber
- 3-5. Farmer Chamber
- 3-6. Condenser Chamber
- 3-7. Extrapolation Chamber
- 3-8. Parallel Plate Chamber
- 3-9. Other Chamber
- 3-10. Electrometers
- 3-11. Correction Factors for Ionization Chamber
- 3-12. Temperature and Pressure Relationship
- 3-13. Exposure Measurement

Sections: III - Radiation Properties

### **Chapter 4. Radiation Beam Quality**

- 4-1. Photon Beam
- 4-2. X-ray Spectrum
- 4-3. Radiation Quality and Quantity
- 4-4. Photon Beam Terminology
- 4-5. Attenuation Process
- 4-6. Intensity Attenuation
- 4-7. Attenuation Coefficients
- 4-8. Filters
- 4-9. Half-Value Layers
- 4-10. Beam Homogeneity
- 4-11. Specification of radiation quality
- 4-12. Measurement of Half-Value Layers

### **Chapter 5. Radiation Dosimetry**

- 5-1. Kerma
- 5-2. Absorbed Dose
- 5-3. Kerma and Absorbed Dose Relationship
- 5-4. Absorbed Dose and Exposure Relationship

- 5-5.  $f_{\text{med}}$  factor
- 5-6. Exposure from Radioactive Sources
- 5-7. Bragg-Gray Cavity
- 5-8. Stopping Power
- 5-9. Mass Absorption Coefficient
- 5-10. SCRAD Photon Beam Dosimetry Protocol
- 5-11. ICRU Electron Beam Dosimetry Protocol
- 5-12. TG-21 Dosimetry Protocol
- 5-13. Phantom Materials and Dosimeters
- 5-14. Calorimetric Dosimetry
- 5-15. Chemical Dosimetry
- 5-16. Film Dosimetry
- 5-17. Thermoluminescent Dosimetry
- 5-18. Solid State Diode Dosimetry

Sections: IV - Photon Beam Therapy

## **Chapter 6. Photon Beam Therapy**

- 6-1. Introduction
- 6-2. Equipment
- 6-3. Beam Specification
- 6-4. Beam Profiles and Penumbra
- 6-5. Percent Depth Dose
- 6-6. Surface Dose and Buildup Dose
- 6-7. Backscatter Factors
- 6-8. Isodose Curves
- 6-9. Wedge Filters
- 6-10. Asymmetric Collimation
- 6-11. Multileaf Collimation
- 6-12. Calibration of Photon Beam
- 6-13. Measurement of Dose Distributions
- 6-14. Inverse Square Effect
- 6-15. Dosimetric Calculations
- 6-16. Field Size Factors
- 6-17. Transmission Factors
- 6-18. Shielding
- 6-19. Endocavitary Radiation Therapy

## **Chapter 7. Clinical Dose Calculations**

- 7-1. Introduction
- 7-2. Equivalent Square
- 7-3. Dosimetric Functions
- 7-4. Percent Depth Dose

## Table of Contents

- 7-5. Inverse Square Law
- 7-6. Tissue-Air Ratio and Backscatter Factor
- 7-7. Scatter-Air-Ratio
- 7-8. Tissue-Air Ratio and Percent Depth Dose Relationships
- 7-9. Tissue-Phantom Ratio and Tissue-Maximum Ratio
- 7-10. Tissue Maximum Ratio and Percent Depth Dose Relationships
- 7-11. Rotational Field Calculations
- 7-12. Blocked Field Calculations
- 7-13. Irregular Field Calculations
- 7-14. Time and Monitor Unit Calculation Techniques
- 7-15. Point Dose Calculations

### **Chapter 8. Treatment Planning - Fundamentals**

- 8-1. Introduction
- 8-2. Single Field Dose Distributions
- 8-3. Parallel-Opposed Fields Dose Distributions
- 8-4. Wedged Fields Dose Distributions
- 8-5. Three Fields Dose Distributions
- 8-6. Multiple Fields Dose Distributions
- 8-7. Rotational Field Dose Distributions
- 8-8. Surface Contour Correction
- 8-9. Tissue Heterogeneity Correction
- 8-10. Energy Absorption of Biological Materials
- 8-11. Integral Dose
- 8-12. Three Dimensional Treatment Planning System
- 8-13. Inverse Treatment Planning System
- 8-14. Terminology and Dose Specification

### **Chapter 9. Treatment Planning - Clinical**

- 9-1. Introduction
- 9-2. Patient Data Acquisition - Manual Contour
- 9-3. Patient Data Acquisition - CT
- 9-4. Patient Data Acquisition - MRI
- 9-5. Patient Data Acquisition - US
- 9-6. Patient Data Acquisition – Simulator
- 9-7. Localization and Verification Radiographs
- 9-8. Portal Imaging
- 9-9. Record and Verification Systems
- 9-10. Patient In-Vivo Dosimetry

- 9-11. Attenuators and Tissue Compensators
- 9-12. Bolus
- 9-13. Skin Dose
- 9-14. Field Blocks Design
- 9-15. Geometric Relationship
- 9-16. Junction or Gap Calculations
- 9-17. Practical Aspects of Treatment
- 9-18. Implants and Prostheses
- 9-19. Patient Positioning

Sections: V - Miscellaneous

## **Chapter 10. Brachytherapy**

- 10-1. Introduction
- 10-2. Specification of Brachytherapy Sources
- 10-3. Brachytherapy Sources
- 10-4. Cumulative Dose
- 10-5. Calibration of Brachytherapy Sources
- 10-6. Dose Calculation of Linear Sources
- 10-7. Traditional Dose Calculation Formalism
- 10-8. Dosimetry Based on TG-43 Formalism
- 10-9. Methods of Source Localization
- 10-10. Isodose Curves
- 10-11. Implant Dosimetry Systems
- 10-12. Superficial Implant Therapy
- 10-13. Interstitial Implant Therapy
- 10-14. Intraluminal Implant Therapy
- 10-15. Intracavitary Implant Therapy
- 10-16. Gynecologic Dosimetry
- 10-17. Dose Volume Histograms
- 10-18. Radiation Safety Aspects of Brachytherapy

## **Chapter 11. Electron Beam Therapy**

- 11-1. Introduction
- 11-2. Electron Beam Interactions
- 11-3. Production of Electron Beam
- 11-4. Electron Beam Specification
- 11-5. Electron Beam Energy
- 11-6. Electron Beam Parameters
- 11-7. Electron Beam Profiles and Penumbra
- 11-8. Percent Depth Dose Curves
- 11-9. Isodose Curves
- 11-10. Calibration of Electron Beam

## Table of Contents

- 11-11. Measurement of Dose Distributions
- 11-12. Virtual Source Position
- 11-13. Dosimetric Calculations
- 11-14. Applicator Factors
- 11-15. Irregular Surface Contours
- 11-16. Tissue Inhomogeneities
- 11-17. Practical Aspects of Treatment
- 11-18. Shielding
- 11-19. Electron beams versus kilovoltage x-rays
- 11-20. Mixed Photon and Electron Beams
- 11-21. Specialized Electron Beam Treatment  
Techniques

### **Chapter 12. Special Clinical Procedures**

- 12-1. Total body irradiation
- 12-2. Intraoperative radiation therapy
- 12-3. Stereotactic radiosurgery
- 12-4. Hyperthermia
- 12-5. Total skin electron beam therapy
- 12-6. Half-body irradiation
- 12-7. Ultrasound Guided Prostate Implants
- 12-8. Intravascular Brachytherapy
- 12-9. Remote High Dose Rate Brachytherapy
- 12-10. Internally Administered Therapeutic  
Radionuclides

### **Chapter 13. Safety and Quality Assurance**

- 13-1. Introduction
- 13-2. Physical Safety
- 13-3. Radiation Safety
- 13-4. Quality Assurance Tools
- 13-5. Kilovoltage Unit Quality Assurance
- 13-6. Linear Accelerator Quality Assurance
- 13-7. Quality Assurance of Cobalt Teletherapy
- 13-8. Quality Assurance of Simulators
- 13-9. Quality Assurance of CT Scanners
- 13-10. Quality Assurance of Remote Afterloading  
Units
- 13-11. Quality Assurance of Treatment Planning  
System
- 13-12. Quality Assurance of Instruments
- 13-13. Block Fabrication Quality Assurance

- 13-14. Dosimetric Checks Quality Assurance
- 13-15. Patient Management System
- 13-16. Brachytherapy

## **Chapter 14. Acceptance Testing and Commissioning**

- 14-1. Introduction
- 14-2. Simulators
- 14-3. CT Scanning System for Radiotherapy
- 14-4. Kilovoltage Generators
- 14-5. Cobalt-60 Teletherapy Units
- 14-6. Megavoltage Generators
- 14-7. Treatment Planning Systems
- 14-8. High Dose Rate Remote Afterloader Systems
- 14-9. Radiation Dosimetry Equipment
- 14-10. Treatment Aid Systems
- 14-11. Brachytherapy Sources and Equipment

## **Appendix**

- Appendix A-1 Equivalent Square
- Appendix A-2 Percent Depth Dose of Cobalt-60
- Appendix A-3 Tissue-Air Ratio of Cobalt-60
- Appendix A-4 Percent Depth Dose of 6 MV Photon Beam
- Appendix A-5 Tissue-Phantom Ratio of 6 MV Photon Beam
- Appendix B-1 Decay Chart of Radionuclides
- Appendix O Solutions to Selected Problems

## **Bibliography**

## **Glossary**

## **Index**
