Skills and Attributes

Arts: Lifelong passion for fine arts, especially drawing and graphic arts influenced by fine art. Everything from the realistic to the abstract, from the traditional to 'edge art', I take on it all. Recent psychology classes enrolled for interest in art and music therapy. Advertising and promotion experience gained by time with GMC newspaper, as well as through self employment and Spaulding Press. Basic HTML skills mixed with strong artistic eye makes for simple and effective web design. Skilled in photography, and film. I am also an experienced writer and musician (Djembe, piano, guitar, vocals). Prowess also in clay sculpture, and water color.

Human

Services: Three semesters of psychology and sociology at CCV has prepared me for work in support services. Observant, and endlessly compassionate, I have a natural knack for caregiving and companionship. Using art and alternative healing, I seek to enable a client to express themselves, have personal insight, and to 'keep the gears moving'.

Self: I am a very friendly cooperative person, and I aspire to be known as a good worker and quick study. Willingly I commit the time and energy needed create high quality art for whom I work, moving as efficiently as possible to meet deadlines. I welcome feedback and I consider myself a 'Jack of all Trades', capable of taking on creative projects conventional and unique. It is very easy for me to communicate, and I see it as it's own art form. 2 Semesters of human service classes taught me how to be an effective listener, which I have applied to different facets in life.

Software: Adobe Photoshop, Illustrator, GoLive, InDesign, Appleworks, MS Word

Hardware: Years of experience using Apple computers, both O.S. 9 and 10. Moderate experience in Windows.
