Slide Two - Problem

Title Each
Slide

Problem

- ◆ What would be the best method to stop biting my nails?
 - Nails look like stubs
 - Mom yells at me all of the time
 - Always bite when I am bored
 - Nails bleed

Problem
Statement

Bullets Exemplify Problem

Slide Three - Research

Internet
Based

Research

- ◆ Nail biting is a habit directly related to thumb sucking
- ◆ Thumb suckers generally become nail biters
- ◆ It is related to OCD
- ◆ Statistics show rate of recovery from habit is lower than heroin addicts trying to kick

Research Information Develops Hypothesis

Slide Four - Research

Unanswered
Question(s)

Research Ask an Expert

- ◆ Are there any proven methods to stop nail biting?
 - No, since it is an OCD, you have to treat what is causing the OCD than you can work on breaking the habit

Expert Clarifies Research Data

Slide Five - Hypothesis

Research
Based

Hypothesis

◆I think I can stop biting my nails best by my mother rewarding me for not biting them. If my my gives me rewards for good behavior, this generally works. I clean up my room, and she gives me chocolate

Guess

Explanation (Why?) Included in Statement

Slide Six - Experiment

Testing
Hypothesis

Experiment

- ◆ Week 1- When, why and how often I bite
- ◆ Week 2-3 Gloves then band aids
- ◆ Week 4-5 Put Nail Biting Solution then Nail Polish
- ◆ Week 6 Mom will give me a piece of chocolate for each hour I don't bite my nails. She will check my nails. If I bite at school, she will take away my play station privileges

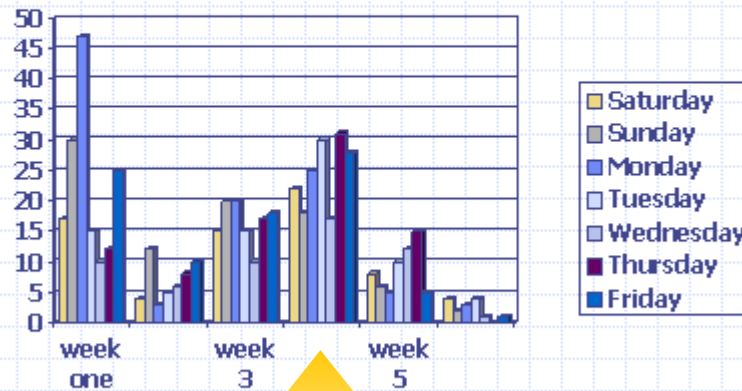

Done Over a Period of Time

Slide Eight - Conclusion

Conclusion

Statement

Analysis/Conclusion

- ◆ From my results I made the following conclusions:
 - Bit with gloves on, Band-Aids didn't help
 - Biting Solution tasted good
 - Polish worked temporarily
 - Chocolate was the best as mentioned in my research. I, like most people am the type that responds well to rewards

Analysis

From Data

Did The Results Match Hypothesis? Why or Why Not?
