

Thornton Travel

At Thornton Travel, we offer travel packages to different periods, from Precambrian all the way to the Quaternary period. Explore lush jungles, endless seas, and creatures you thought were extinct. You never know, you might even have the opportunity to meet a very distant relative.

Geologic Time

Travel to a Distant Time

Mr. Mann's 7th Grade Life Science

November 11th, 2003

An Exploration of a Lifetime

Your Goal

- Choose a Geologic period of your liking.
- Research the time period with fellow group members.
- Construct a Tri-Fold travel brochure that will lure fellow students to travel to your geologic time period.

Carboniferous Period Flora

- Include interesting examples of plants, animals, landscape, and weather patterns that will interest fellow students to venture into your time period.

Time Period Choice

Decide with fellow members geologic time periods from Precambrian to Quaternary. Once your period is chosen, no other group can choose it.

Tri-Fold Travel Brochure

<http://office.microsoft.com/templates>

Go to the listed website, type tri-fold in **search**, then download the template brochure. You will use this template as a base to construct your own Tri-Fold brochure. Change all graphics as the current displays won't work.

Group Research

Use the charts on pages 188-201, they list information on the geologic eras. You can also use the Internet for more in depth information and photos/clip art that will go in your brochure.

Creativity

Create a brochure that really stands out! Don't be afraid to think with your imagination. Make sure that you use appropriate photos and content that are your own.

Points Available

Brochure Design: 30 points

Content: 30 points

Presentation: 20 points

Collaboration: 20 points
