

A List of Run Commands For Windows 7

Written by Michael

Sunday, 05 December 2010 02:01 - Last Updated Sunday, 05 December 2010 07:02

On the Microsoft Windows operating system, the Run command is used to directly open an application or document whose path is known. It functions more or less like a single-line command line interface. The Run command no longer appears on the Start menu in Windows 7. You can access Run command in two different ways, firstly you can access through start menu search box by just typing run and enter. Secondly you can access through Windows shortcut key, Windows key + R. [You can even add Run Line command Permanently to the Start menu for easier access.](#)

To use the commands just type the command on Run box and hit enter or click ok as shown below

Below are the list of Run Commands for Windows 7

Calculator = **calc**

Certificate Manager = **certmgr.msc**

Character Map = **charmap**

Check Disk Utility = **chkdsk**

Control Panel = **control**
