<:: TIPS ::>

What to tell while facing this obvious question - Tell me about yourself?

This is to know about - how much you have understood about yourself. So don't deviate from the question while answering. The order of your answer may be as given below...

1. About your location - where do you come-from/live/stay.
2. Latest graduation that you are in progress or completed.
3. Why did you choose that graduation and how it is going to support your career.
4. Your ultimate aim... and how this job and your graduation going to help to achieve.
5. Your uniqueness/approaching-problems/strengths
6. Interests/Hobbies/Additional certifications.
7. * Do not tell about your weakness, informations that are mentioned in your resume.

Maximum of 60 seconds. These are almost enough.

Don't tell everything in a single question. Allow the interviewer to ask about your family, weakness, schooling etc... if they are interested in it.

I hope this will help you to crack the interview.
