I am now offering my services in tutoring for General Chemistry I this semester. As a former student teaching assistant in the chemistry department here at FAU, I now can offer my inside experience and knowledge of this course to students.

I offer a relaxed, laid-back approach to the course material, and try my best to explain problems in layman's terms to improve comprehension and understanding of general chemistry. I encourage students to come prepared with questions, and be open to a fun, open forum learning environment conducive to learning.

My service is guaranteed 100% satisfaction, or your money is fully refunded, no hassle. I do not believe you will be able to find a better tutor now.

Historically, this course is particularly high in withdrawal rates and low in test performance.

I can help you achieve the high grade you want if you are willing to work for it.
