25-Oct-06	Ra	Me	Mo

How to strategize : Use of the information regarding strength of long term Level I & II and comparatively shorter term Level III TSP can be made for strategizing on investment. Suppose the long term Level I & II are assessed as good and a forthcoming Level III (short term) is also good, then buy it and then partly exit nearing a bad Level III, leaving some qty. for a future good level III TSP. However if forthcoming Level I or II is assessed as bad/ weak, then holding it becomes more risky. Over and above keep fundamentals & technicals in the fore front and use these projections for second opinion only.

- Astro chart has good strength for mid term.
- **Period 16/07/05 to 25/11/05 :** Ra/Sa/Me is running as TSP. Sa & Me have good co-relation in the astro chart. **Green period is good for the stock but for some bad transits.** MP5 was putting bad influence from 13th to 26th Sept. Price slid down in spite of the fact that overall market was moving upward till 21-22nd. Thereafter market moved downward but transits were not so bad for this stock. This stock remained in a comparatively better position. Now one important Planet would transit to the next position on 25th Oct. 05 Hopefully this position would be favorable for the stock.
- **Period 25/11/05 to 19/01/06 :** Ra/Sa/Ke is running as TSP. Ke is well positioned and therefore **a good period for the stock.** However the transits are weak after mid December.
- **Period 19/01/06 to 23/06/06 :** Ra/Sa/Ve is running as TSP. Ve is also well positioned. Its co-relation is also good and therefore **again a good period for the stock.**
- **Period 23/06/06 to 08/08/06 :** Ra/Sa/Su is running as TSP. Su position is not so comfortable. Next periods also seem bearing mixed results. Better examine to book profit as and when transits go weak, price start sliding down any time during June. Of course refer to conventional methods viz. Fundamentals and technicals before arriving at any decision.

It may be noted that sometimes a forthcoming good/ bad TSP can start giving results few days in advance of its commencement. This happens on account of parallax phenomenon.

This report can be found useful only after understanding the basic concepts as given on the link : <http://www.geocities.com/cosmostocks> If a TSP during a period is strong it doesn't mean that price would move up and up only. Ups and downs would take place on account of constantly moving positions of the planets. However, there is a good probability that at one or the other stage during the period, the price would move appreciably up. Likewise for the bad/ weak TSPs. This point is well explained on the above link.
