In spite of the excellent assessed strength of TSP and the excellent fundamentals, it is advisable to wait for signals through Technicals. While waiting for signals, a little more price is being paid under this strategy. However it proves safer and therefore preferable.

- Astro chart indicates good strength for long term.
- Sa period at Level II proved strong and the current Me period at Level II is proving still stronger.
- The TSP Sa/Me/Ke (23/10/05 to 20/10/05) is strong in principle but the current transit positions are weak. After an upside move up to 82/83 level, the price has slid down.
- The next TSP Sa/Me/Ve during 20/10/05 to 01/04/06 is very strong. While transiting, Sa will also move to a good position from 25/10/05. Commencement of a good upside move is highly probable in the forthcoming weeks. Closely watch technicals in the coming days for decision to buy good quantity.
- Me, the Level II TSP (upto 08-01-08) is strong and therefore this stock seems suitable for long term. However Su, the Level III TSP during 01/04/06 to 21/05/06 seems weak. If entering in the coming days, it would be appropriate to book part profit before 01/04/06 (of course depending on signals through technicals) leaving some quantity for booking good profit in future.

It may be noted that sometimes a forthcoming good/ bad TSP can start giving results few days in advance of its commencement. This happens on account of parallax phenomenon.

This report can be found useful only after understanding the basic concepts as given on the link :

<http://www.geocities.com/cosmostocks> If a TSP during a period is strong it doesn't mean that price would move up and up only. Ups and downs would take place on account of constantly moving positions of the planets. However, there is a good probability that at one or the other stage during the period, the price would move appreciably up. Likewise for the bad/ weak TSPs. This point is well explained on the above link.

**How to strategize :** Use of the information regarding strength of long term Level I & II and comparatively shorter term Level III TSP can be made for strategizing on investment. Suppose the long term Level I & II are assessed as good and a forthcoming Level III (short term) is also good, then buy it and then partly exit nearing a bad Level III, leaving some qty. for a future good level III TSP. However if forthcoming Level I or II is assessed as bad/ weak, then holding it becomes more risky. Over and above keep fundamentals & technicals in the fore front and use these projections for second opinion only.
