- Astro chart has excellent strength. Level II Mo is exceptionally strong. Mo as Level II commenced from 14-10-04 and price started moving up and up.
- Period 30/09/05 to 17/12/05 : Ra/Mo/Me is running as TSP. Though Mo is strong but Ra & Me co-relation is not so comfortable. Transits are putting dominant influence on price movement. Still good improvement in price level is probable on account of excellent strength of Mo any time when Transits also turn good during the period. **This is the right time to examine to buy.**
- Period 17/12/05 to 18/01/06 : Ra/Mo/Ke is running as TSP. Ke is well positioned and strong but the transits are weak most of the period. Price may move slow or almost stagnate.
- Period 18/01/06 to 19/04/06 : Ra/Mo/Ve is running as TSP. Ve is well positioned and strong. Mo at Level II is already excellent. Its co-relation with Ve is also good and therefore **an excellent period for the stock.** Better examine to book part profit as and when technicals so suggest during this period.
- Analysis of further periods shall follow later.

It may be noted that sometimes a forthcoming good/ bad TSP can start giving results few days in advance of its commencement. This happens on account of parallax phenomenon. Moreover Transits may disturb the otherwise expected results as discussed exhaustively on the site.

This report can be found useful only after understanding the basic concepts as given on the link : <http://www.geocities.com/cosmostocks> If a TSP during a period is strong it doesn't mean that price would move up and up only. Ups and downs would take place on account of constantly moving positions of the planets. However, there is a good probability that at one or the other stage during the period, the price would move appreciably up. Likewise for the bad/ weak TSPs. This point is well explained on the above link.
