- Astro chart indicates mixed results in long term. The forthcoming Level II (Ju) is very good. However, many of the Level III Planets are weak. Consequently, sharp ups and sudden downs in price are probable during July 06 to Sept 08.
- The current period Ra/Ma/Ju during 27-09-05 to 17-11-05 may prove ordinary and price may remain side-ways during most of this period. The next Level III period from 17-11-05 to 17-01-06 seems very good for up move.
- The Level II is strong specially during July 06 to Sept. 08 with few good and many bad Level III periods. Consistency in growth seems lacking. With this background, though investment in this stock is feasible but close monitoring is necessary. Keep a special watch for favorable and unfavorable developments in its fundamentals and exit at appropriate time to re-enter later.

It may be noted that sometimes a forthcoming good/ bad TSP can start giving anticipated results few days in advance of its commencement. This happens on account of parallax phenomenon.

This report can be found useful only after understanding the basic concepts as given on the link : <http://www.geocities.com/cosmostocks> If a TSP during a period is strong it doesn't mean that price would move up and up only. Ups and downs would take place on account of constantly moving positions of the planets. However, there is a good probability that at one or the other stage during the period, the price would move appreciably up. Likewise for the bad/ weak TSPs. This point is well explained on the above link.

How to strategize : Use of the information regarding strength of long term Level I & II and comparatively shorter term Level III TSP can be made for strategizing on investment. Suppose the long term Level I & II are assessed as good and a forthcoming Level III (short term) is also good, then buy it and then partly exit nearing a bad Level III, leaving some qty. for a future good level III TSP. However if forthcoming Level I or II is assessed as bad/ weak, then holding it becomes more risky. Over and above keep fundamentals & technicals in the fore front and use these projections for second opinion only.
