Basically the astro chart is sufficiently strong.

The current Level I (Ju) operating from Oct. 2000 (for 16 yrs.) is ordinary in strength.

The current & the next two level II Trend setting period(s) viz. Me, Ke & Ve (till 2011) are good.

Since three consecutive Level II periods (running for more than 5 yrs.) are good, this stock is rated as 'good' for investment for long term.

Within these three Level II periods, there would be few good and other bad Level III periods.

Me as Level II commenced from 10-06-05. Ju/Me/Me during 10-06-05 to 05-10-05 is influencing as above average. Price level moved up from 13-14 and touched 20.

Next periods Ju/Me/Ke & Ju/Me/Ve seems ordinary. The price may rise and fall on account of Transits (MPs) whereas the role of these TSPs appear to be neutral. These periods can be used for accumulating this stock if technicals so suggest. Next periods from 09-04-06, Ju/Me/Su, Ju/Me/Mo and Ju/Me/Ma may prove good. The price may rise to good extent with obvious swings on account of Transits. The next period Ju/Me/Ra during 15-09-06 to 17-01-07 appears very strong. The price may zoom. It may prove to be the right time for booking part profits.

Analysis of the next periods shall follow later.

**It may be noted that sometimes a forthcoming good/ bad TSP can start giving results few days in advance of its commencement. This happens on account of parallax phenomenon.**

This report can be found useful only after understanding the basic concepts as given on the link : <http://www.geocities.com/cosmostocks> If a TSP during a period is strong it doesn't mean that price would move up and up only. Ups and downs would take place on account of constantly moving positions of the planets. However, there is a good probability that at one or the other stage during the period, the price would move appreciably up. Likewise for the bad/ weak TSPs. This point is well explained on the above link.

**How to strategize :** Use of the information regarding strength of long term Level I & II and comparatively shorter term Level III TSP can be made for strategizing on investment. Suppose the long term Level I & II are assessed as good and a forthcoming Level III (short term) is also good, then buy it and then partly exit nearing a bad Level III, leaving some qty. for a future good level III TSP. However if forthcoming Level I or II is assessed as bad/ weak, then holding it becomes more risky. Over and above keep fundamentals & technicals in the fore front and use these projections for second opinion only.
