

# Computer Insecurity

## Paul Williams

Mr. Williams is known for breakthrough innovations across a diverse array of sciences and technologies. His areas of expertise include computer security, programming, electronics, and weapons development.

Until November 03, Mr. Williams was Chief Technology Officer of GalaxyCSI, a Washington, D.C. based company which performs classified work for the U.S. Government. Mr. Williams is now a principal at Gray Hat Research. <http://www.grayhatresearch.com>

Mr. Williams works regularly with federal law enforcement as a cyber crime advisor. He is certified by the U.S. National Security Agency (NSA IAM) and is a nationally recognized authority on white hat network security.

At one time, Mr. Williams' personal collection of 22,000 computer viruses and 800 Trojan Horse programs was considered among the world's largest collections.
