INFORMATION NOTICE

Cycle Lanes for Te Awe Awe Street

In October of this year a concept design for the introduction of a low impact cycling facility for Te Awe Awe Street was delivered to residents and businesses in the street, with feedback requested from those with concerns about how the proposal might impact on their own property.

The final design drawings are now available and the plan for the entire section is attached. All feedback has been considered when finalising the design, and where possible, specific concerns have been addressed.

Thank you for participating in this process.
