Hurricane City Power is a city owned power provider and is governed by the City Council. Our team of thirteen full time department employees and four shared city employees strive to provide the City of Hurricane with reliable and economical power for the community's needs.

Power department operations and planning are overseen by the Power Board. Meeting information can be found under the **[Power Board web page](#)**.

Hurricane City Power Department has earned a Reliable Public Power Provider (RP3®) designation from the American Public Power Association for providing reliable and safe electric service.

The RP3 designation recognizes public power utilities that demonstrate proficiency in four key disciplines: reliability, safety, workforce development and system improvement. Criteria within each category are based on sound business practices and represent a utility-wide commitment to safe and reliable delivery of electricity. The RP3 designation now lasts for three years. Hurricane City Power Department is one of 2 utilities statewide and of 29 utilities nationwide that earned the Platinum Level designation this year. In total, 219 of the more than 2,000 public power utilities nation-wide hold the RP3 designation. Hurricane City Power Department increased it's RP3 designation level from Gold to Platinum. Hurricane City Power Department's RP3 application was scored at 96%.

"We're honored to receive the RP3 designation," said Dave Imlay, Power Director of Hurricane City Power "The Power Department strives to provide safe, reliable energy to our customers. This RP3 Platinum designation illustrates that the Power Department is on the right track"
