

## Gerald F. Bresnahan, M.D.

501 East Hardy • Inglewood, California 90301 • 310-672-3636

To whom it may concern:

As Chief of Cardiology at a major southern California medical center, I have treated just about every type of heart disease there is. I am the designated cardiologist for the President of the United States as well as many other visiting dignitaries, including the Pope. I also helped to develop the special enzyme test that is used in hospitals and medical centers around the world to confirm when someone has experienced a heart attack.

Over the years, I have come to realize that, when I treat disease, I know that I have already lost at least part of the battle. So whenever possible, my primary goal is to prevent, rather than just treat disease.

I believe that BiosLife 2 is one of those very potent weapons in the on-going struggle to maintain our good health. This unique product is a patented dietary supplement containing several fascinating natural components, all working together to prevent disease. We already know that the average American diet contains half the fiber it should.

BiosLife 2 contains a balanced matrix of seven different natural fibers, combined with calcium carbonate to increase its effectiveness. It is further enhanced with powerful antioxidants and trace minerals. Of special importance is a niacin-bound chromium compound that's vital in carbohydrate metabolism.

This unique combination acts together to do a number of important things. First, it carries 2 U.S. patents for its method and composition in the reduction of cholesterol. And I can tell you from my own personal experiences, and those of many of my patients, that it works very effectively in lowering cholesterol. Numerous medical studies have shown that by cleansing the blood of cholesterol, we can dramatically reduce the incidence of heart attacks and thus early death.

Second, by controlling carbohydrate metabolism, treatment of both hypoglycemia and diabetes may be improved. And controlling diabetes may further decrease your risk of vascular disease.

Third, we also know that increasing fiber intake may reduce the risk of such lethal diseases as prostate, colon and breast cancer. It may also be a good way to help maintain your blood pressure in the normal range.

Finally, as a bonus, the major side effect of BiosLife 2 is that it gives you a pleasant feeling of fullness when taken before a meal. It is thus an integral part of Rexall's newest weight loss program, BodySynergy.

In all my years of practice, I have never seen an all natural product that is even remotely as effective as BiosLife 2 for it's preventive health care potential. I feel that BiosLife 2 should be taken by everyone who has the wisdom to understand that the best way to treat disease is to prevent it.

Sincerely,

Gerald F. Bresnahan
