

Math Lesson Plan

Standard:

Number Sense 6.1: Students solve problems involving mixed numbers, fractions, percents, and decimals.

Objective:

To solve a problem involving mixed numbers.

Anticipatory Set:

Students will have sets of numbers on an overhead that are missing certain numbers. They are going to have to figure out which numbers they need to fill-in for the missing numbers.

Instruction:

- 1) Warm-up Review
- 2) Teacher will put up a graphic organizer explaining how to solve a problem involving mixed numbers.
- 3) Teacher will provide a step by step account of how to solve the problem.
- 4) Teacher will emphasize four points: Understand, Plan, Solve, and Look Back.

Guided Practice:

Students will do numbers 1-3 on Page 23 of their math book.

Independent Practice

- 1) Students will complete the Independent practice on Page 23 of their math books.
- 2) Once they are finished with that they have a folder with worksheets that they need to complete.
