## The Electromog Detector

Detect "electromog" hotspots in your Environment caused by wireless devices

Three different sounds help you differentiate sources of digital pulsing microwave frequency signals.

***Detect most common wireless sources from:***

- Digital cordless DECT phones
- Mobile phones
- Computer wireless networks
- Bluetooth UMTS
- Mobile phone masts and base stations
- Baby monitors
- Microwave technology

**Technical specifications:**

Frequency Range: 50 MHz to 3000 MHz

Sensitivity: 0.01 volts per metre (V/m)

Output: Audio Loudspeaker, Audio jack socket

Controls: On/Off Switch, Volume
