

Спелон

My mask represents the character Creon.^{1 day}
Creon is a very power hungry man. He also has features of courage, and sternness, with facial features of a serious shaped mouth slanted eyebrows and bald eyes. He is a King and would stereotypically be ~~stern~~ greedy.

My mask is exceptionally smaller than the others and has contours for the forehead and nose. The colors are Dark red, depending and the area of the mask, orange, green, and yellow. It has two small eye holes and a rectangular mouth.

The mask is meant to ~~make~~ make Creon's serious appearance stand out. I made the face of a slanted mouth and bright eyes because of the mental features of Creon here it represents the character by having serious and bitter features.

The Greeks used masks for their dramatic plays in the theatre, and I wearing it in practically, the same way.
