

Respected President of the United States of America.

Mr. George W. Bush.

<http://www.un.int/usa/index.php>

[USUNPublicAffairs@state.gov](mailto:USUNPublicAffairs@state.gov)

and

Respected Senator,

Mrs. Hillary Rodham Clinton.

[http://www.hillaryclinton.com/help/contact /](http://www.hillaryclinton.com/help/contact/)

CC: Mr. David M. Walker

Comptroller General of the United States.

US GOVERNMENT ACCOUNTABILITY OFFICE (US  
GAO)

[contact@gao.gov](mailto:contact@gao.gov)

I've read attentively the speech that you it uttered, President G. W. Bush, at the opening of the United Nations Assembly, on September 25, 2007, and I took the freedom of weaving comments seeking to increase this International Institution, that it is UN, aiming at to collaborate with your government which is closer to the end and for the future government that will probably be leaded by Mrs. Hillary Rodham Clinton, for the enlargement of the USA, that it need a great and urgent help, of the Positive Moral Capital injection, to avoid turning itself into a great social cyst, generating this way, an enormous internal misfortune, and, consequently, destroying anything that gravitate in the financial system, that today are in it orbit; in this Liberalist Capitalist Democracy, that has been provoking an American unsustainable domestic situation, in what concerns the strong fiscal unbalance, a deterioration of the public health, a decline of the Scientific Instruction's level, a disarray of the environment, the awkward War with Iraq, an unexpected immigration policy and finally an highly selfish Feeling's Education, provoking growing destruction of the "American Society" due to the appearance of the low degree of notion of Positives Morals and of Positive Ethics and, consequently influencing in the human's psyche behavior, not generating conditions of construction but the destruction of it own Nation and of it hegemonic power before the Globalize World; provoking a deep alteration and grown geopolitics and geo-economics axis of the planet, coming to provoke a war of coins, where the Dollar can largely be substituted by Euro and simultaneously for an Asian hard currency and in future, partly also for a representative coin of Mercosul, with pre detectable consequences of they be appraised in what it plays to the chaos, swallowing us to all, in the beginning of this not structuring process if energetic and proper cares could not be taken.

*We are living by a disturbed phase where Homo-sapiens became already Homo-economicus and soon will turn into Animalis-homo.*

Gentlemen, I am not communist, I am not Nazi, I am not Fascist, but certainly I will propose you that analyze my considerations, because I am a Societocratic Republican that has:

*The Love for Begin, the Order for Base; and the Progress for objective.*

President Bush, when, in the beginning of your speech where is said that, *sixty years ago, representatives from 16 nations gathered to begin deliberations on a new international bill of rights. The document they produced is called the Universal Declaration of Human Rights -- and it stands as a landmark achievement in the history of human liberty*; they made a huge mistake carat when unhappily they forgot to dictate the referring DUTIES's norms: Individual, Domestic, Civil, Western, Oriental and Planetary, necessary the best social coexistence in a peaceful way, in the Mother Planet Earth. And so that this *Declaration must guide our work in this world*, as it is in your speech, there is need to increase it, with the notions of DUTIES, without which nothing of peaceful will reach in this Earthily Republic. In case the G. W. Bush and Hillary Rodham Clinton consultant ship want to know the DUTIES, I will send a work of my authorship and of Mr. Pierre Laffitte, that at this time is in Portuguese, but I will have pleasure to flow for English if it goes of your will in receiving this free copy.

*But with certainty, there is need to subordinate the selfishness to the Altruism and the Rights to the DUTIES.*

For that, I was devoted recently to writing the *Universal Declaration of the Human DUTIES and of the Human Rights* which I'm sending in attachment, for your appreciations and if possible I would like to request a discussion about it in UN.

For the Declaration it is accomplished, President Bush, with view avoid as you said, *that the innocent people are trapped in a life of murder and fear, the Declaration is not being upheld. When millions of children starve to death or perish from a mosquito bite, we're not doing our duty in the world.*, but with certainty, it doesn't advance the analysis of the *societies they be only focused* in the field of the Material Capital - (\$), indicating us that being *the we be out of the global economical prosperity we're all worse off. Changing these underlying conditions is what the Declaration calls the work of "larger freedom" -- and it must be the work of every nation in this assembly*, so that we can have better plans of Education, that is, techniques of to subordinate the selfishness to the Human Altruism and to subordinate the Rights to the DUTIES, *to liberate the people of the tyranny and of the violence, of the hunger and of the disease, illiteracy and the scientific ignorance, and poverty and despair.*

There is not doubt President Bush, *that Firstly the United Nations mission requests the freedom people of the tyranny and the violence.*

The first article of the Universal Declaration should take the following composition to express the freedom, the loving feelings, the equalities, the duties and the rights:

#### Article 1°

*Every human Beings are born free and equal in dignity and in opportunities to accomplish the Individual, Domestic, Civil, Western and Oriental DUTIES; as well as to the regarding the Earth Planet; and to demand your Rights that don't thwart your respective DUTIES. Endowed with scientific reason and of Altruistic feelings; should act with courage, prudence and perseverance, with the other Beings human, with the objective, of creating the fraternity spirit. Equality only of opportunity. Only the Merit (capacity, competence, altruism and situation) it is the promotion factor.*

It would like to alert you that the non innocent people, of which your Nation belongs to, must have a President that worries much more about your internal problems, where the homicide index, of robbery, of drugs consumption, of alcohol, of gambling and of violent children and young people, that are highly well Instructed but badly EDUCATED; killing friends in the universities, become more fraternal. The USA Pathology - A Perplexed Country with its own self, where we can question:

*Why did "you already wonder the children and do the American youths possess these types of antisocial behavior and why doesn't this happen in India and in China "?*

See, in my article attached, a superficial analysis of your society, where the "Positive Moral Entropy of the American Society" is signaled for "zero", alerting us the tendency for the road of the "social implosion", forming a " great black hole", even with all it progresses in the sciences and technologies, of the more assaults of the modern world, that is going swallow to all to the same "spiraled tunnel of the black hole".

The futurism above expressed, is not except, the result of the extension of the scientific spirit to the domains of the Positive Sociology and of the Positive Morals Sciences, noticed and organized for August Comte, a social reformer; the Master of the Masters that was already a lot of proven times and that in the middles of the Century XIX, already expressed his concern about the evolution

When in your speech, President Bush, you affirm that *the best way to defeat extremists is to defeat their dark ideology with a more hopeful vision -- the vision of liberty that founded this body*, that is UN, you forget that mainly in the field of the

behavior of the education of the soul or psyche or mind human, we know that only can be destroyed what is substitutable for something that presents emotional advantages, for the extremist to leave extremist; it is not for a terrorist's physical destruction that the others will be destroyed. It is shaping all youths' soul tendency to the extremism or no. You mention that several Nations among them, the one of *the Palestinian Territories have moderate leaders, mainstream leaders that are working to build free institutions that fight terror, and enforce the law, and respond to the needs of their people. The international community must support these leaders, so that we can advance the vision of two democratic not States democratic, but Societocratic Republican ones, Israel and Palestine, living side by side in safely and peacefully.*

The recipe to make a cake of Christmas, using the same ingredients, depending on the place that it's produced, it varies of taste. Taste is like religion, it is not discussed and nor it is imposed, it is learned in childhood, mainly with mother's intermission and later it is chosen or not to change to another, because it depends on the Feelings, of the Intelligence and of the Character of each one; that is, of the Soul or psyche or mind of each single person; that can evolve for the selfishness or for the predominance of the Altruism. Therefore we have to mold the future leader's souls of these two civilizations, in a same "School of Statesmen" so that the mutual respect appears; and not only for the use of the force of the military weapons, to try to create unstable shortcuts.

It is a utopia but never a chimerical mentality

As GOD only solves the problems in the kingdom of the Heavens, because HE is Absolute, Omnipotent, Omnipresent and Omniscient; and here in this Mother Earth Planet, where everything is RELATIVE, that is, everything's connected, it is impossible through HIM the sociological problems and moral terrestrial Humans to be resolved pacifically through GOD, that really commands and it orders Beyond in the life of the "Grave". For those who really believe in GOD'S existence, I guarantee them that only when there they arrive there will be resolved. But it doesn't tell this truth for all, for us to avoid more conflicts.

Therefore always it was and it will be like this:

"Who wins the War appeals in saying that GOD is on your side ".

This way the Religious conflict in the Earth planet not for never, if we don't attack for the Education of the Human Soul; compressing the selfishness and to expanding the Altruism in Palestinian's and Jews souls from its conceptions to make them more fraternal with each other; with the subordination of the selfishness to the Altruism. There is need to Educate the future Jewish and Palastinian Mothers, not only for the childbirth preparation, as well as for the positive moral preparation; respecting the culture of each one's of the civilizations, Modifying but Conserving.

But for the extremist religious extremist leaders, there is apparently the tendency that the conflict generates the fortification of the Religious Unit, what doesn't stop being true, but it means a high stamp of predominance of the selfish feelings on the Altruists; what doesn't take the Personality subordinated to the Sociability to be generate Peace in the Earth planet.

*These countries that have been accomplishing their tests recently to obtain the freedom, like Ukraine, Georgia, Kyrgyzstan, Mauritania, Liberia, the Serra Leoa and Morocco*, they need urgently to be aided, because the democracy generated by the change imposed by the new regime provokes in many times a state of anarchical Progress and retrograde Order.

As these populations are not educated morally and instructed scientifically to assist their government managements, I'd recommend analyzing the execution of a political type of government regime that mainly assists the Freedom with high responsibility and with free press.

I suggest **Societocracy Republican** that assists the before *Democracy* phase, that will be reached gradually with the educational political training of those statesmen and governed, with passing of the years; avoiding return to the tyrannical dictatorial regimes (military or not) and communist, trying to empty the terrorists' intentions.

The same above exposed it would apply to Lebanon, to Afghanistan, to Pakistan; to Iraq; to Iran; it would be also a suggestion to finish it of the Dictatorship in Burma; in Cuba; in Zimbabwe and in Sudan.

*In second place*, as you, Mr. President, said, *the mission of the United Nations requires liberating people from hunger and disease. Article 25 of the Universal Declaration states: "Everyone has the right to a standard of living adequate for the health and well-being of himself and of his family, including food and clothing and housing and medical care." Around the world, the United Nations is carrying out noble efforts to live up to these words.*

I want to give you congratulations for the innovative initiative that proposed to alleviate the hunger, as it happens in the camps of Sudan and to other places of the world; *where America would buy the local farmers' crops in Africa and in another part, to improve the transport of the feeding of the developed world. This would help to build a more modern local agriculture and it would break the cycle of the shortage in the world; and I incite the Congress of the United States of America to assist this initiative*, because this initiative is not of benevolence or alms, but of moral initiative, what is difficult of being understood and fully comprehended by the

feelings of the Capitalists monetarists of the American Congress. But, if approved, the public health has to be alert for the problems of sanitary hygiene; and the control of the birth rate should be one of the conditions for this plan to be approved and put in practice; as well as the non mechanization in excess so that the hand of local work comes gradually to be substituted by the machine, in the direct reason of the reduction of the birth rate. Reducing the birth rate and increasing the mechanization; where this mechanization won't come to collaborate with excess of emission of pollutant gases.

One more great fact of the USA in promoting the investment in medicine to combat HIV/AIDS, with huge amounts in order of \$30 billion, should also simultaneously program educational and social projects, with the use of preservatives as an effort to eradicate this disease that is present in all whole worlds today. We cannot stop pointing out the combat programs to the malaria, that USA have been announcing and collaborated to extinguish or to minimize this disease, in all the world.

*In third place*, as you said in your speech to UN, which has the responsibility of *liberating the people of the illiteracy and of the scientific ignorance*, in agreement with the Article 26 of the Universal Declaration that should take the following composition:

Article 26°.

Every person has the right of being educated and instructed. The education and the Instruction should be free, at least the correspondent to the fundamental elementary teaching. The elementary teaching is obligatory. The technical teaching and professional should be widespread; the access to the superior studies should be open to all in equality of opportunity, and the selection should be in function of your merit (capacity, competence, altruism and social situation).

The education should seek to the full expansion of the human sociability - in the search of the *Tenderness* and to the reinforcement of subordinating the Rights to the DUTIES THE MEN; and of the fundamental freedoms and it should favor the understanding, the tolerance and the friendship between all the nations and all the racial or religious groups, as well as the development of the activities of the United Nations for the maintenance of the peace.

To the educated parents belongs the prior right of choosing the religious education way to give to their children.

President Bush, there is not doubt, when you affirm *that the nations make the investments needed to educate their people, the whole world benefits. Better education unleashes the talent and potential of its citizens, and adds to the prosperity of all of us. Better education promotes better health and greater independence. Better education increases the strength of democracy, and weakens the appeal of violent ideologies. So the United States is joining with nations around the world to help them provide a better education for their people.*

*A good education starts with good teachers. In partnership with other nations, America has helped train more than 600,000 teachers and administrators. A good education requires good textbooks. So in partnership with other nations, America has distributed tens of millions of textbooks. A good education requires access to good schools. So in partnership with other nations, America is helping nations raise standards in their schools at home, and providing scholarships to help students come to schools in the United States. In all our education efforts, our nation is working to expand access for women and girls, so that the opportunity to get a decent education is open to all.*

This great effort of good extraordinary intentions still left something to desire, for that I request license to extend, with suggestions, some ideas so that this effort can benefit the Education of the Americans and of the other nations of the World, trying to reduce the conflicts aiming at to reach Peace in the World.

The " Natural Philosophical Laws of the Understanding ", noticed by August Comte, that unknown by most of us, allows to tell us or to affirm that the knowledge transfer can be framed at this time in two great groups: the one of the Education of the Feelings, when we taught the human beings to subordinate their selfishness to the Altruisms or Vice versa and the Instruction that represents the knowledge stored in the Intelligence in a fetishist, theological, metaphysic and or finally Scientific or Positive way.

Then:

- a) The Education teaches how to handle the Feelings.
- b) The Instruction teaches how to handle the Intelligence.

And to put in practice the feelings and the reasoning, through the three forms the we express ourselves – mimic, verbal and writing; there are the Character (courage, prudence and perseverance), of each individual, of each Family, of each Homeland or Civilization, that possess several degrees of Education and of Instruction, that police the Action; for to happen or not. This everything is part of our psyche or soul.

But as it are the Feelings that command the Intelligence, and this last one gives a "feedback" to alter the oscillations of the Feelings, so that they happen other levels of reasoning; therefore, we have that firstly we act to mold the Feelings, for the techniques of Education in the children and later more ahead for the human being age, we try to Instruct him Scientifically.

If we want to spread the conflicts in all these levels of the society, let us subordinate the sociability feelings to the personality ones; it is what the Democratic Capitalist Regime suggests for your survival. Expansion and Competition, using the maximization of the Scientific Intelligence, but not abandoning completely the reasoning fetishist, theological and metaphysicians,

because each human being, it can be simultaneously containing his still influences fetishist, theological and metaphysics in your reasoning.

The Problem of the World was always and it will be the RELIGIOUS - religious is understood here like Interconnection - the Cult, the Dogma and the Political Regime. One in the ways discipline it is to separate the State (Regime) of the Church (Cult and Dogma); the regime can be a Republican Societocratic, Federative, Presidential, Municipalist, Capitalist / Laborite. *Pronunciature Republican*

We need to dose the Altruism and the selfishness; but always subordinating the selfishness to the Altruism, so that there is social harmony, to happen the forward-looking Progress and the harmonic Order.

In this paragraph of your speech President Bush, where you says:

a) *So in partnership with other nations, America is helping nations raise standards in their schools at home, and providing scholarships to help students come to schools in the United States*; really in what it plays the Scientific and Technological Instruction they are extraordinary in Mathematics, Astronomy, Physics, Chemistry and Biology. But in the Education they are highly negative and unqualified, because they ignore the Philosophical Natural Laws of the Sociology and Moral Positive sciences, for that they put in conflict these students that come back for yours origins countries; and in case they come wrapping up with politics of been local, they are murdered by terrorist-priests that religiously are confronted with the loss of the religious power for these new ideas coming of the Occident.

b) *In all our education efforts, our nation is working to expand access for women and girls, so that the opportunity to get a decent education (instruction) is open to all.*

As more social chaos, more easily we thinks that is solved the problems by the violence acts, because the ignorance of the Sociological and Moral Natural Scientifically Laws, to avoid the conflicts and to prepare plans to minimize them are still far away from happening with the Governments administered by the Statesmen of the 8-Group.

This Education and probable Instruction should be open to all that possess opportunity equality and that those that have the Merit expire; but we have to respect the:

*"Division of the occupations so that there is union of the efforts "*. Aristotle

For best to clear this posture noticed by Aristotle, below there is a part of the prototypic Societocratic Constitution that I am elaborating, which approaches this subject.

7.2 - that the couple's Woman and the daughters, be guided by the Priests, together with the Media, to show that the Woman's best work is in the children's Moral Education, inside of the Home, being consecrated in the domestic work, turning More altruistic, the men with which they live together with; husband, children, parents and siblings, by purely a Mental and Moral action. Receiving a mensal material remuneration of the STATE, that gives them integrally, the value of the Salary of Maintenance, added of 50% of the balance of the Salary of Productivity, after having he, the earnings of the husband, been abated of other expenses of the couple - of the Home and you correlate.

7.2.1 - the Women that for luck, due to your nature or from necessity, due to the inadequacy of the masculine work, in the breast of the Family, want to be devoted out to the Salary of the Home, that they make her, if they want like this, of common agreement with the spouse; since it doesn't harm the Moral Education of the Children, until the 14 year-old age.

7.2.1.1 - being the Woman exclusively excluded of the military service and of the industrial works, visibly incompatible with the physical and moral conditions of her sex.

7.2.1.2 - as the Woman and the man are physical, mental and morally different, one from the other; and in equality of social conditions, the Woman is superior, for being More altruistic; therefore her function is the improvement of the man, while man's function is improving the World; therefore, the Woman's participation, in the Political and Administrative life, doesn't implicate that this is her normal function, but just a consequence of the spiritual freedom, insured to all citizens, of both sexes, national, nationalized or foreign, residents in the... (NAME OF THE COUNTRY)

And another factor of relevance is that the Mother Woman has the responsibility of Education the children until the 14 year-old age. Because wanting or not, "Day Care" is "business ", it doesn't transmit Love of Mother, this is one of the reasons of the great American social problems

Likewise are formed the barbarians! The sociable "without love".

There are barbarians of religious origin, the ones that kill for the selfish pleasure of the destruction for a collective cause, known by terrorist suicides, to satisfy your personal desires that guarantees a privileged place in the kingdom of the Skies and high prestige and won financial extensive to relatives, besides spiritual rewards after the death. Certain psychosis is characterized by the total absence of emotively and of compassion, exactly what allows to the terrorist to kill and to kill her, without embarrassments. It is a gesture noticed as worthy; however it is highly selfish of the suicide, in these cultures. He thinks much more about him

that in the others that didn't ask to dies. The more you try to kill the probable terrorists, more they appear with revenge spirit. Violence generates Violence.

*Let's use the cunning and the Altruistic feeling, as weapon and ammunition respectively, so that Hercules of the Century XXI dominates the proliferation of Hydras of Lerna of your Century. Because if you try to kill them, they will proliferate in an exponential way. For that we will have to use a Justice that does I accomplished the Laws of the DUTIES, with severe punishments for those that not to accomplish them, after judgment and condemnation.*

The Education of these being it is when of your childhood in knowing to create in your sentimental formation, the use of educational plans that come to educate them in subordinating the selfishness to the Altruism. I will present in case it is requested which the selfish and Altruistic instincts, according to August Comte's Cerebral Theory.

*Finally, as you said: the mission of the United Nations requires liberating people from poverty and despair. Article 23 of the Universal Declaration states: "Everyone has the right to work, to free choice of employment, [and] to just and favorable conditions of work." In the 21st century, this requires ensuring that people in poor countries have the same opportunity to benefit from the global economy that citizens of wealthy countries have.* I hope the American Government and the American State get solutions of Positive Moral stamp to heal the high unemployment degree, as for instance, the disappearance of the American textile industry, that exposes the perverse effects provoked by the globalization; creating Ghost Cities, you manufacture disabled and deep social domestic disharmonies; with reflexes in your future generations; where nowadays 35 million North Americans live below the poverty line - 12,5% of the population.

President Bush, when you say that the *United Nations provides vital economic assistance designed to help developing nations grows their economies and reaches their potential. The United States agrees with that position; we've dramatically increased our own development assistance -- and we're delivering that aid in innovative ways. We started the Millennium Challenge Account to reward nations that govern justly, fight corruption, invest in their people, and promote economic freedom*, it has been in vain most of the times, because these countries, that are living dictatorships, are not prepared to receive the Democracy, nor your rulers directly, never yours governed. There is need to seek a more appropriate form of Political Regime that makes the transition for the Democracy. With Societocracy Republican there will be larger chance than there is transition in developing with smaller violence, in smaller period.

With certainty President Bush, this type of Political Regime with its molded Constitution to assist your needs and your managerial forms, will retrigger the corruption, one of the saddest factors than they harm vastly as much the Republican Democracy as Societocracy Republican.

For this picture to change, it cannot only *count with help of the Dollars of the it USA*, therefore you must have noticed that recently in Pakistan, where dollars sent for they be invested in armaments and ammunitions in the border with Afghanistan they are being diverted for the border with India. It is not only to place at these places former-students of North American Universality in they have been born corrupter rich in poor countries, with speaking fluent English, that will solve the problem of the terrorist conflicts in these countries; it is necessary to move the regime, for us to alter the mix of the components of the Congress, of the fiscalization system, of to combat the corruption and etc. ; for us, to be more representative and more capitalists / labor and patriots; not only Globatriotas in the defense of the benefit of the transnational, due the strategic prime matters of the international market, as for instance the petroleum.

As you said:

*"The dollars should reach those that need and get results".*

Without the change of political regime, for Societocratic Republican, we won't see *any practical result, even if the dollars arrive in those that need and they dream to have results*, in many countries, same here in Latin America.

The corruption is very big in these Nations.

Here in Brazil it is a popular dictation that says the following:

*It doesn't "advance to change the pigs if the pigsty stays the same"*

In these countries where political and public employees prevail there are thieves of public and liars, that dominate the Governments through fraudulent democratic elections, with support orchestrated by Assemblies of political parties dominated by having adopted corrupt, never in long period *the best way to remove the people of the poverty* will be only with the Internationalization of the Trade, with the extinction of the Tariff Barriers and with Investments. There'll have more bankruptcy of the factories and unemployment, provoking new investments in other sides of the world, enriching the financiers and for the proletarians and the Industrial owner's, always happening Winners and Losers; provoking already wastes of the scarce prime matters available in the world and collaborating with high pollution level for the unbalance of the echo-system.

Recently Senator Hillary Rodham Clinton, pré-runs for office to the political place that you occupies, she declared and she still criticized the commercial agreements of Doha, that don't include clauses to protect the workers and that don't impose more rigid environmental rules; and it complemented saying: We *"know with certainty that the other countries want to have access to our markets*

*because of our high consumption levels, since in the United States we don't know how to save " Don't know how to save, it is highly dangerous.*

About the control of the proliferation of nuclear weapons of mass destruction, all the men of good sense agree in supporting them.

With relationship to the Human Rights is really necessary to reform the Council of the Humans Rights of the UN and its norms, for a Council of the Duties and Human Rights, where the Rights are subordinated to the DUTIES, whose suggestion proceeds attached.

With relationship to the Council of Safety of the UN, it would like to alert that the permanent members should be the same ones, with the inclusion of India, without the incorporation of Japan that is highly warlike, that was already your terrible enemy; enemy will always be enemy same that fakes to do the peaces. In the first opportunity, that feels that we are weak, it gives us change.

Taking advantage of last paragraph of your speech, to congratulate him, when you say and I insert certain complements and comments:

*With the commitment and courage of this chamber, we can build a world where people are free to speak, assemble, and worship as they wish; a world where children in every nation grow up healthy, get a decent Education, where we know how to subordinate your selfish feelings to your Altruistic feelings, and look to the future with hope in Living for Somebody else; believing in a Demonstrable Faith, a world where opportunity crosses every border. America will lead toward this vision where all are created equal, and free to pursue their dreams. It is lacking a lot of discipline, from Moral stamp, to America to reach this focus. This is the founding conviction of my country. It is the promise that established this body. And with our determination, it can be the future of our world.*

*Thank you, and that God blesses;* with my GODDESS'S advices, the Humanity \*.

Hoping this work still comes to be useful to the Powerful United States of North America, I wish them,

Health, with respect and Fraternity,

Paulo Augusto LACAZ. [lacaze@terra.com.br](mailto:lacaze@terra.com.br)

\*Humanity = It is the conjunct of the Being convergent from the past, to the future and of the present, that they competed, they compete and they will compete for the Improvement of the Good to Being Social Human in the Mother Earth Planet.
