

DARE TO SUCCEED

We are anxious to admit the value of knowledge, and we know also that love makes the world go 'round. The truth is that ignorance can destroy us if we don't know our history and repeating our mistakes is likely to happen and could *again* burden us down.

Someone made the observation, "What goes around comes around." If we observe that principle, we could conclude, how true, how true. It is not the *Golden Rule* but the powers of suggestion does weigh heavy on ones consciousness... nevertheless our lives, with God's help, are up to me and you.

To go back to where we started, backward so to speak profits us nothing. We must be traveling forward whether rocky or smooth. The past has happened, *its over*. We are responsible for what's going on now. How it is done; the way things happen; and dealing with the future is also up to me and you.

We all know that success does not come without some setbacks. However, failure will only be temporary if we keep trying. All good things are obtained at the expense of giving up something else. For our own good prosperity and adversity are balanced against each other. Don't give up! ***Always seek...Always try!***

William T. (Bill) Richardson, Jr.
