A project by EARTHQUEST (Canada)

www.geocities.com/earthquestcanada

Canada's first international Biological Field School

This field school will provide a wide diversity of academic programs in field biology, ornithology, botany, ethnobotany and primatology

Since 1996 EARTHQUEST has operated programs in Canada, North America, Central and South America and southeast Asia.

Still, here at home, **We need your help...**
to make this project a great success.

- * Data collection techniques, analysis and interpretation.
- * Field identification techniques and methodology.
- * Scientific report writing and submission requirements for Ecological Land Classifications, Environmentally Sensitive Areas, etc..

For more information on our projects and programs, please contact:

Earthquest (Canada) for the Environment

519.875.3340 P.O. Box 24142 London, Ontario, Canada N6H 5C4

Please email for a complete
Program/Course catalogue

"A Hiker's Guide to the Flora and Fauna of the Niagara Escarpment World Biosphere Reserve"

Since 1999, EARTHQUEST has completely documented all vascular plants, amphibians and reptiles, birds, mammals and butterfly species within 25 metres of either side of the trail from Owen Sound to Tobemory. The field guide also includes *hotspots for birding, wildflowers, butterflies, mammals, amphibians and reptiles* within 20,30 & 45 minutes of the 'tip, middle and bottom' of the trail along the Bruce Peninsula.

EARTHQUEST was happy to submit this data to local biologists for use in environmental impact studies and universities to update information on the Niagara Escarpment World Biosphere Reserve.

We need your help.

By raising additional funds for printing, we will be able to increase our circulation of the field guide, including the potential free distribution to local schools and libraries and educating a larger audience on the importance of the natural history of the area .

We offer an excellent 'Recognition' program to all of our sponsors with many benefits and promotional opportunities.

Every dollar counts and we want you to know we appreciate all of your efforts.

Your contribution to this endeavour will help us ensure the future protection of this unique ecosystem.

Today's choices are made with tomorrow's goal's in mind.

EARTHQUEST (Canada) is dedicated to raising awareness and financial support for environmental initiatives.

Joining efforts in conservation, preservation, protection, improvement and restoration of endangered, threatened or vulnerable species and their habitats.

For more information on how you can help or about any of our projects, courses or programs, please contact:
