

A REPUBLIC CITIZEN-CENTERED

Platform for the III General Election
Movamáintsch Repúblican pör Pecüliárismeu

martâ 2006

PRÁIMHOCT

preface

Today, the Movamáintsch Repúblicaan pēr Pecüliárismeu declares itself to be the people's party fighting for a progressive Talossa where progress it's favoured towards better conditions and new policies, ideas and methods for the Republic. We are committed to only one thing: the advancement of Democracy here at home and all over the micronational community. We hold our arms in friendship and cooperation to any and all persons and parties who will be committed and dedicated in our struggle to achieve a better Republic.

Today, the MRP asserts that it represents the marketplace of ideas, a place where ideas of any sort are exchanged without prejudice. In our endless search for augment the democracy, we hope to extend this dynamic marketplace to the entire Republic so much so greatest ideas that will bring most benefit for the people of Talossa will rise to the top and will be implemented.

Today, the Republic finds itself in the midst of prosperity, progress and peace. We have arrived at this point because of the hard work of the Talossan people. This election will be principally about the big choice we have to make to secure prosperity that is broadly and progress

that reaches all people. In the year 2006, the MRP stands ready and waiting to meet the challenges that face our nation and to build on our achievements.

Today, we live in a moment that is not of absolute guarantees but one of clear possibility. We must remember and recognize that our achievements were accomplished only with courage, creativity and conscience; with a willingness to imagine; and with a recommitment to the basic values of hard work, community, embracing diversity, faith and personal responsibility.

Today, we must not forget that Talossa's future did not always seem so bright. Under the "Old bad days", Talossa was suffering from social, political and cultural stagnation. Hope and optimism were scarce. Several months later the record is clear: cultural and provincial revitalization, strengthening of democracy, easy access for non English born Speaker, a record of protecting civil rights and liberties, popular initiative, and many new citizens.

During Talossa's darkest hours, we have strived mightily and succeeded in meeting the challenges of our times. The question before us is whether we will continue to do the same; whether we will seize this moment

to bring more prosperity and progress to the Republic. In its Platform, the MRP lays out its plans to do just that.

If one theme runs through this 2006 Peculiarist platform, it is this: if Talossa has to secure prosperity, progress, democracy, accessibility, peace and security for all, we cannot afford to go back. We must move forward together and we must not leave anyone behind.

PIRNEÇAR

ELS DREPTS DA TOCT

upholding the rights of all

Individual rights -and the responsibilities that go with them - are the foundation of a free society. In protecting these rights and in asserting those responsibilities, we affirm the common good, and common goals, that should unite all Talossans.

Equality of individuals before the law have always been a cornerstone of our party. We therefore oppose discrimination based on sex, race, age, religion, creed, disability, or national origin and will vigorously enforce anti-discrimination statutes. We call on all Talossans to reject the forces of hatred and bigotry. Accordingly, we denounce all who practice or promote racism, anti-Semitism, ethnic prejudice and religious intolerance.

For this reason we will work to improve the accessibility for non English born Speaker and Women augmenting the competences and the actions of the Minister of Minorities Affairs.

In the immediate term it will work closely with the Ministry of Immigration providing for the translation of all the immigration and prospective materials in the most spoken languages and in those spoken in the Republic.

The Minister will also nominate Referents for each language in order to help non English born speaker in the

naturalization process and in understanding the Republic in the first period of citizenry or every time help is needed.

An MRP Administration will also seek to implement the judicial system by way of establishing a Federal Lower Court to judge all the cases that are not exclusive competence of the High Court, as provided in the Constitution, introducing in this way the Constitutional Right of Appeal.

The authority over this court will be solely vested in the High Court which also nominates the judge who will be able to run for a Parliamentar of Ministerial Position.

Together with this we will also start working on the compilation of easy Civil and Criminal Codes arguing with topic inherent and peculiar to the Republic.

DA MUI TEUX, VIENS

from many, one

Talossa's ethnic diversity within a shared national culture is unique. We come from all major continents and we benefit from our differences, but we must also strengthen the ties that bind us to one another. The MRP will continue to support the integration of our culture into our national life. The hard work of many individuals has allowed us to make great leaps in this

area, but we feel the Republic has only grazed the surface.

The culture has a great depth, any with proper research and hard work we can bring our amazing culture to the forefront. We hope to bring out more traditions, "Talossanize" names and places, further integrate the Talossán language with standard English.

Our action in the cultural field so we'll be focused on el glheb, "talossanize" means prefer using the talossán names of offices and officers instead of the English one if it exists, and sponsoring the publication of the modification to Talossán made by la Icastolâ months ago and the compilation of the famous "Teach Yourself Talssán" lessons.

In the MRP we believe that the Government should have a voice in developing our culture, but this should not be a complete control: the Culture belongs to the Nation and is independent from State's Officers, which have only to sponsor it and working to made it known to the People. Along with this we hope to establish a National Archive, to store all the versions of the documents of talossán history and an Excellency Award .

The citizens of Talossa is what this Nation is most proud of, and our continued prosperity depends on the influx of new citizens and retention of old ones. We welcome all new Talossans who are prepared to follow our laws, provide for themselves, swear loyalty to the ideals our Republic follows.

To these ends, the MRP proposes a overhaul of our immigration and naturalization system: fastening the process without changing the substance of the system that prefer quality instead of quantity; realization of an "Immigration Brochure" to illustrate to prospectives how the process function and introducing them the basis of functioning of the Republic;

together with the Minister of Minorities Affairs, translating the brochure and all the immigration documents in the most languages spoken and the nominating the Referents.

Finally, the MRP will propose the formation of a Commission that will create a report that details ways to promote Immigration.

GOVERNAMÁINTSCH PÈR EL POPUL

government for the people

Trust, pride and respect: we pledge to restore these qualities to the way Talossans views their government. It is the most important of tasks and reflects the overwhelming desire of our citizens. The MRP is committed to make the government citizen-centred and results-oriented.

The Séneschal, the Cabinet and the Parlamînt are seen by the MRP as the political institution given the right to rule and legislate on behalf of the People of Talossa and we will work to make them in synergy with the popular will.

The MRP swears to the Talossan People that we will ensure the constant activity of the Chamber – even if we have to replace one of our own. We will make a Talossan tradition that the Sénschal and Ministers have “Question Time” in the Parlamînt every two months.

Most importantly to the MRP is bringing the Government back to the People; we welcome greater participation of the citizens of the Republic by giving them a right to participate in the political process. To achieve this we will introduce three new popular votes: Popular Initiative, Abrogative Referenda and Advisory Referenda. The first one provides a means by which a bill seconded by a certain minimum number of electors is submitted to

the Parlamînt to be voted on; Abrogative Referenda are binding referenda, asked by a consistent number of electors, that have the power to repeal a law; Advisory Referenda are instead non-binding referenda to advise the

Government or the Parlamînt of the will and desire of the Citizens.

The mesures above are meant to increase Democracy and Partecipaton, but MRP searching for democracy is endless. We are persuaded that there are three flaws in our legislation that we hope to eliminate.

The first law has to assure the impartiality of the President of the Republic by way of don't allow him to be a Minister: how can he represent the national unity and beeing a constitutional guarantor of the law presented by the Cabniet and approved by the Parlamînt, if he's part of the sponsor of those laws?

The second one has to prevent the approvation of “ex post facto” law. A retrospective law is a law passed after the occurance of a fact or commission of an act that retrospectively changes the legal consequences or relationships that existed prior to the enactment of the law; we believe that these kind of laws are one of the most dangerous for Democracy in every Nation because they break the necessary transparency between citizens and goverment.

The last one is the “Republican Clause” that states that the Republican form of State of our Nation shall not be object of a Constitutional Amendment.

The MRP also hope to establish a Talossán Postal Service and an Electoral Commission which will research and study more democratic alternatives to the current system.

Local government has been something always lacking in the history of our Nation, and we hope to make thr Provinces a more critical part of the Republic. We believe that each Province must be responsible for developing the local culture, and we will also support a review of the provincial system nd the possible consolidation of various provinces for the purposes of efficiency and activity. We

hope that in time, provincial assemblies will be formed and a new dimension will be added to the political and cultural life of the Republic.

DUCAZIUN ÎN AFAÈS ÛTPHÄTSESCHTI

leadership in foreign affairs

The attitude of our nation micronationally have changed over the last year, but the values of our Nation have not. Today let us reject the blinders of isolationism and let us not dominate others with our power - or betray them with our indifference. Let us have a Talossan foreign policy that truly reflects Talossan character: the modesty of true strength and the humility of real greatness. Today we live in an age where Talossa can help model micronational ideals and institutions for many years to come. Our generation of Talossans with its allies and friends can build a different and better community, promoting Talossan interests and principles.

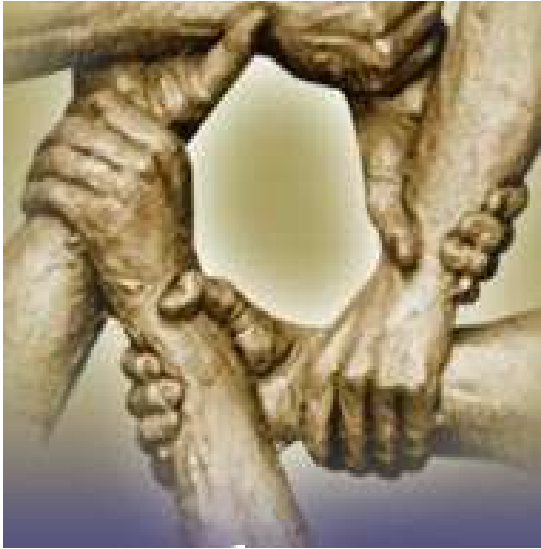

Through a distinctly Talossan internationalism, a new Peculiarist administration will build public support for a new strategy that can lead the Republic of Talossa toward a more peaceful and prosperous micronational community. We know that Talossa is safety when more and more nations share a profound belief in political and economic liberty, human dignity and the rule of law.

Today, we will restore our nations sense of micronational purpose and honor. A Peculiarist administration will identify and pursue vital Talossan interests and will set priorities and stick to them. Under our leadership the Republic of Talossa will build and secure the ESTO project started by PSD Foreign Minister Furxheir in which two pecüliáristàs

are already involved. We hope to finally establish a brand new Micronational Community that will bind together the great and principled micronations and add a new dimension to micronationalism.

We will not impose our culture but will propose our principles. Yet we accept that the basic values of human freedom and dignity are universal and this shall be a cornerstone for our approach to foreign affairs.

We believe that Talossa is one Nation whereas separated into two states of different design: we uphold intertalossan cooperation, but only if there's a recognition of the parity of the two States. We don't want that the Kingdom recognize the legality of our Secession, because every "Revolution", their greatness, act in an illegal fashion to correct what is legal but believed unjust. We simply ask that at the basis of cooperation between the two states there will be the recognising from the Kingdom of the parity of

the Republic: if they continue to consider us "inferior", there will not be any cooperation between institutions.

Finally, we hope to codify a law that states how Treaties that delineate the relationship between pacific States or Organisation shall be enforced.
