

PROXHECT FUILÁN:

1. **Re-contact** all past Prospectives (a lot!) and Friends in order to re-create the situation that led them here; trying to re-born in them the past enthusiasm that we left expire.
2. I'm firmly convinced that we must import a revolutionar concept inside our Ministry: **the Ministry should care about Prosectives and guide them hand-by-hand in the process.** That means;
 - o Create and automatically have every Prospective enrolled in a **Prospectives List**. This mailing list will create a place where Prospectives can talk to each other and have a confrontations on their process and the reasons that brought them here. The List will be also a powerful tolls for the Minister to keep regular contact with them and reminds them the process'steps. (a similar list will be created and managed for the Friends of the Republic).
 - o Create 2 brochures: one that illustrate the process (with sample of bio and essays, etc) of acquiring citizenship, that should be sent to every Prospectives (and Friends) as soon as they acquire the status; another one that explains to new citizens the basic of the Republic, what they should do to vote and how the system run, stand for office, take part in the cultural and provincial life, etc. This easy and concese "talossa for begginers" guide should be sent to every new citizens. (and prepared by the Ministry of Information and those who may want to help him).
 - o Assure and make those important documents and every other documents concerning immigration available in the most spoken languages. And trying to offer to prospectives a contact in their mother language.
 - o Minister of Immigration should have a constant contact with every prospectives, mantaining them active and contacting them when they disappear. "*Guide them hand by hand*" means beeing always in contact and **help them through the process**: eg. "Are you finding difficulties in writing the Essay?" "Which ones?" "I remember you that after having written Bio and Essay, you should ask for a vote on your citizenship, do you want I'll do this for you?" etc.. etc...
3. **MARCHETÁTX**: The principal and most successfull (I believe) are:
 1. **Google AdWords** (*Minister of Finance/Information*): with a little annual expense we can have a powerful and broad marketing tolls. AdWords are those advertising that Google display in his searching page and on the sites which displays those boxes called "ads provided by Google". We can set up them on the keywords, for exemple: *micronation, conlang, languages, politics, country, talossa*.
 2. **Wikipedia**: as Talossa as a whole is considered notable by the moderators of Wikipedia, they will certainly allow the page about Talossa (if there's an agreement between the Kingdom and us) to be about both states. This will be a significative tool to attract immigrants, as Wikipedia is one of the site with the highest number of visitors.
 3. **Getting in touch with the ConLangers community** and their site and mailing-lists. Should I have to explain this? ;-)

This is only a sketch of course. Anyway I believe that thanks to the 1st point of the proxhect (recontact all the past prospectives) we can gain at least 10 new citizens. And with the Marchetátx part (that needs to be developped and improved by other Ministries) many more
