Footnotes Although the headline ranking figures show several changes in the survey this year, what is equally significant is the pattern of clustering among the schools. Shading on the tables denotes the four different clusters.

* Percentage increase from of MBA to today.

** Rank

***KPMG reported on the results of obtaining evidence and applying specified audit procedures relating to selected data provided for the Financial Times 2003 MBA survey ranking for selected business schools. Enquiries in the process can be

made by contacting Michelle Podhy and Patrick Gaudet of KPMG by email at mpodhy@kmpg.ca. The specified audit procedures were carried out during November and December 2002. The audit date denotes the survey for which the specified audit procedures were conducted.

**** Estimate

† Because of the heavy weighting of research in the table, the FT research rank has been recalculated to include only the schools in the region. All other criteria which show data in a rank format retain the school's international position.
