Java & J2EE: Getting started on Java and Java Server Pages. It's easier than you think.

ASP.NET: Get started using Visual Studio Express, SQL Server.

Databases: Installation of SQL Server, MySQL and Oracle all at once.

Oracle Maximizer: Learn over a half dozen major software packages offered by Oracle. Including 11g.

WAMP: Windows, Apache, MySQL and PHP: Learn what fuels most of the internet. WAMP for Windows. Ruby, Python and Perl too.

Rapid Install on Windows: Install multiple web and database software at once! Great way to learn major software on Windows.

Show how to set up a development environ.; Be more effective when working with DBA's and server admins. Help Improve troubleshooting skills.

I am a training and application consultant who offers a unique hands on approach to learning and applying the latest web and database technologies quickly and effectively. I will visit your site and provide hands on training and consulting for the following areas:

J2EE... Java... Tomcat... ASP.NET... Visual Studio... Linux... Apache... PHP... Python... C/C+... connecting to Oracle... MySQL... SQL Server on a Windows XP or 2000 or Vista PC.

- 1. Provide hands on training on the leading database, middleware developer in a relaxed and introductory format.**
- 2. If you are deciding between Java and Microsoft.Net or Oracle and SQL server, I can install required software to help make that choice**
- 3. Training budget cutbacks? If you are looking for cost effective ways to train your developers, make them more effective, keeping them on top of current technology, I can help.**

Need help with Oracle E-Business Suite applications?

Approach (1) 1-2 days Install all major software bundles. I'll install the software on one more client PC's. We'll ensure connectivity is working, run a few examples and move on.

Approach (2) 1-2 days More In-depth We'll focus on a major category e.g. Java or ASP.net This will be hands on as each developer will install, configure and do a tutorial

For each developer, we will assess the experience level and adjust accordingly. I will introduce additional technologies for more seasoned developers.

Need more help?

I can help you move ahead with any of the software. Prototyping? I can assist with a development or production setup. If your site has many developers, I can help setup a training program.
