"During internal AMD beta tests, we experienced excellent Pc-Check performance on the AMD 64-bit development systems. Eurosoft has also taken the step to include significant memory test algorithms....."

Rich Heye, AMD

Home > Demo Request

Thank you for your interest in Eurosoft's PC reliability solutions. The Pc-Check demo provides you with useful, but limited capabilities of the full product...

> Click for Pc-Check Product Information

Please note that accurate contact details will ensure you receive your evaluation right away.

Pc-Check© Demo Limitations

- Burn-in/Command Line testing is disabled
- all configuration options can be viewed but cannot be executed.
- Memory testing is limited to the first 4MB of extended memory (the full program can give you over 64Gb if required!)
- Hard disk testing is limited to the first 20MB (the full program gives you over 2-Terabytes!)
- Hard disk destructive testing is disabled (this is not 'data erasing' - buy ZeroData for this critical process).
- The evaluation times-out and must be rebooted after 15 mins (each boot reduces the total use time so buy the full program!)

Some email services, eg. Hotmail and Yahoo, have size restrictions on their mailboxes. You may not be able to receive the Pc-Check evaluation.
