Products Hard Disk Drives

Continual Innovation...Hard Disk Drives

Toshiba's line of 0.85 inch, 1.8 inch and 2.5 inch hard disk drives deliver the right product to meet the needs of the portable PC and non PC market. Built with the performance and reliability characteristics that have made the company a world-renowned leader in the hard drive industry, Toshiba's line of hard disk drives support fast data transfer rates and seek times while delivering the right product for both PC and non PC markets.

Coupled with industry-leading performance specification are the drives' industry-leading capacities. With capacities ranging from 2GB up to 100GB* Toshiba has the right hard drive for you. With the new 0.85-inch HDD, Toshiba continues to lead the market by delivering gigabytes of capacity packed into a tiny hard drive that fits on your fingertip. Toshiba's 1.8 inch HDDs are smaller than a credit card and lighter than a traditional pager and come in both a PC Card version, and ATA version. The 2.5 inch hard disk drives are 9.5 mm high and meet the range of needs for portable computing environments.

When you need a hard drive that can deliver power, and unparalleled performance look to Toshiba.

Features & Benefits:

[1.8-inch Type II PC Card](#)[1.8-inch ATA Interface](#)

0.85-Inch

Never before has something so small held so much. Toshiba continues to push the envelope on small form factor storage with its latest market introduction, a multi-gigabyte hard drive that is 0.85 inches in diameter.

Only a quarter the size of a 1.8-inch hard disk drive and about the size of a postage stamp, the 0.85-inch HDD will boost the functionality of a new generation of products, including mobile phones, digital audio players, PDAs, digital still cameras, camcorders and more.

1.8-Inch

Toshiba's 1.8 inch hard disk drives are the horsepower behind some of today's most popular mobile and digital devices. The drives are smaller than a credit card and lighter than a traditional pager and come in both a PC Card version, and ATA version.

2.5-Inch

The 2.5 inch hard disk drives are 9.5 mm high and provide an ideal solution for mobile computing and consumer electronics need to deliver more power and functionality.
