SKOBAN

the most simple language in the Universe

Introdução

Skoban is a constructed language spoken all over the world by nearly one person. According to the inventor of this language, Ancient Skoban started to be spoken by the mutant inhabitants from planet Borgon who taught it to the Mokay warriors to finally become the official language of the entire Zorgon Galactic Empire (known as ZGC in the US).

Ok, that was the bullshit part, now comes the serious part:

This language was invented with the purpose of being the most logical and simple as possible, easy to learn for people from all over the world. It has only 150 basic words, that you can combine with each others to express any concept. You yourself, after reading the grammar book, will be able to construct new words according to the (few) rules of Skoban, and be understood by any other Skoban speaker (if you find one).

The most original grammar rule is that if you spell a basic word backwards, you get the opposite meaning. For example, in Skoban Distok, "**YA**" means "you" and "**AY**" means "me". "**YAN**" means "yes" and "**NAY**" means "no", and so on. If you understood this, you just learned almost half the grammar there is to be learned!

Skoban is a constructed language, just like Esperanto, Elfic or Klingon.

The word "Skoban" means "this language" (**sko**=this, **ban**=language) in the original Skoban or ancient Skoban or classical Skoban, whatever you want to call it.

Skoban Distok, aka Super Basic English, is a second version of Skoban, where each basic word from the original Skoban was replaced by new words remotely similar to English ones. The aim was to make it even more easy to memorise the 150 basic words. Skoban Distok is therefore, a kind of English Pidjeon, or Creole language, keeping the structure, orthography and grammar of the ancient Skoban. "Distok" also means "this language" (this talk) in Skoban Distok.

Other versions of Skoban are possible, like "Selan" based on French, "Disspresh" on German, "Estfal" on Portuguese, "Jedjiang" on Chinese, "Yebol" on Hindi and so on, all using exactly the same rules.

Exemplos de frases Skoban Distok:

Ay tok Distok – Eu falo distok.

Ya tok Distok, nay? – Fala distok?

Bilya ud bi wat? – Como te chamas?

Ay lav ya! – Eu amo-te!

Gramática I Construindo palavras

Regra Nº 1: Básicas

Só existem 150 palavras básicas. Aqui vão 5 exemplos:

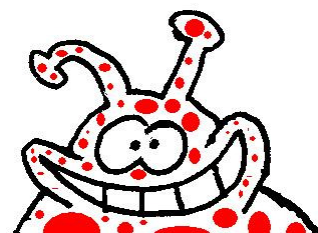

yan means "sim"

man means "pessoa"

kar means "veículo"

wot means "water"

aws means "casa"

Regra Nº 2: Opostas

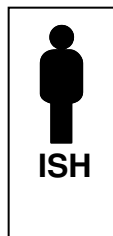

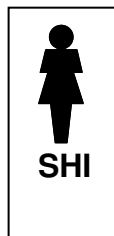

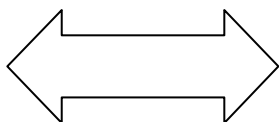

Esta é a característica mais original desta língua. Escrevendo uma palavra básica de trás para a frente, obtem-se o seu oposto. Eis as opostas das 5 básicas acima mencionadas:

Básicas

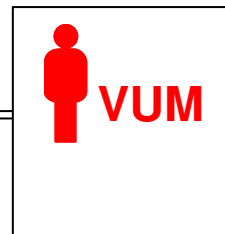

yan means "sim"
man means "pessoa"
kar means "veículo"
wot means "water"
aws means "casa"

Opostas

nay (oposto de **yan**) means "não"
nam means "animal"
rak means "mercadoria"
tow means "fogo"
swa means "rua"

KANNAY
NALDUF

O oposto de SHI (ela) é ISH (ele).

O oposto de MUV (mover) é VUM (parar)

The opposite of LAN (land) is NAL (air)

The opposite of FUD (food) is DUF (you figure out this one)

Regra Nº 3: Compostas

Juntando duas básicas obtem-se uma composta. Também se podem juntar opostas e outras.

wot(water)+**kar**(veículo) = **wotkar**(barco)
shi(feminino)+**man**(pessoa)=**shiman**(mulher)
niw(nova)+**man**(pessoa)=**niwman**(jovem)
tow(fogo)+**man**(pessoa)=**towman**(bombeiro)

tow(fogo)+**nam**(animal)=**townam**(dragão)
wot(water)+**nam**(animal)=**wotnam**(peixe)
kar(veículo)+**nam**(animal)=**karnam**(cavalo)
rak(mercadoria)+**man**=**rakman**(passageiro)

niw(nova)+**shi**(feminino)+ **tow**(fogo)+**kar**(veículo)+**man**(pessoa)=**niwshitowkarman**(jovem condutora de um carro dos bombeiros)

Por vezes pode-se usar as letras "E" ou "H" entre duas básicas que formem uma composta:

ma (mãe) + **am** (filho) = **maham** (filho da mãe)

am (filho) + **ma** = **amema** (mãe do filho)

the order counts:

fudstik (sausage) is different from stikfud (kebab)

two separate words have a more general meaning than two joined words

wotnam fish wot nam water animal

Regra Nº 4: Repetição

Repetindo uma básica, obtem-se um superlativo, um exagero do seu significado:

manman means "povo, multidão"
karkar means "engarrafamento"
wotwot means "inundação, dilúvio"
towtow means "incêndio"

awsaws means "cidade"
namnam means "manada, barão"
plantplant means "floresta, selva"

Regra Nº 5: Intermédias

Por vezes, entre as básicas e as opostas ficam as intermédias. Acrescentando a letra “R” (ou se preferir, a letra “L”) a uma básica, obtém-se uma intermédia. Há casos em que se obtém uma segunda intermédia acrescentando um “R” ou “L” à oposta:

Básicas

yan “sim”
wot “water”
al “tudo”

Intermédia 1

yarn “talvez”
wolt “álcool”
lal “parte”

Intermédia 2

trow “lava”

Oposta

nay “não”
tow “fogo”
la “nada”

Regra Nº 6: Plural

Is means “plural, vários, poli”

karis carros
manis pessoas
bigwotkaris navios

ayis, ayhis nós
bilayis nosso
bilisayis nossos

shiis elas
istokmanis políglotas
islavmanis polígânicos

Regra Nº 7: Possesivo

Bil means “pertence a”. (Já agora aproveitem para aprender os pronomes pessoais)

bil + **ay** (eu, mim) = **bilay** (meu)
bil + **ya** (tu, ti, você) = **bilya** (teu)
bil + **shi**(ela) = **bilshi** (dela)
bil + **ish**(ele) = **bilish** (dele)
bil + **dis** (este, ele) = **bildis** (dele)
bil + **dris** (aquele, ele) = **bildris** (dele)
bil + **ayis** (nós) = **bilayis** (nosso)
bil + **yais** (vocês, vós) = **bilyais** (vosso)
bil + **shiis**(elas) = **bilshiis** (delas)
bil + **ishis**(eles) = **bilishis** (deles)

wat bi bilya neym? – como te chamas (qual é the teu nome?)

bilya neym bi Frank – the meu nome é Frank

dis kar bil Paula – este carro é da (pertence à) Paula

da nohaws bilal – a escola é pública

Lib, a oposta de **Bil**, means “a que pertence, ter”, e **Bril**, a intermédia, indica uma pertença recíproca.

bilay kar – the meu carro

libay lan – a minha terra

brilay shiman – a minha mulher

bilay upklod lib tri dyas – meu chapéu tem 3 bicos

Regra Nº 8: Nomes próprios

Os nomes próprios podem ser escritos na sua língua original ou em inglês, com a ortografia destas línguas ou com a ortografia Skoban. Por exemplo, “Alemanha” pode escrever-se de qualquer uma das seguintes maneiras:

Deutschland

Germany

Doitshland

Djermani

Os nomes próprios também podem ser unidos a palavras básicas para obter palavras compostas mistas:

Italia + man = Italiaman (italiano, pessoa italiana)

Italia + tok = Italiatok (italiano, língua italiana)

Italia + an = Italiaan (italiano)

Os nomes dos continentes, oceanos e planetas também podem ser ditos em Latim. names like brands and political or nobility titles can also be said in the original language or English.

Regra Nº 9: Números

la – 0, nada - **al** – tudo **alal** – infinito

si – 1 - - **is** – vários **isis** – muitos

tu – 2 - - **ut** – metade

tri – 3 - - **irt** – um terço

tutu – 22

kil nainund sikstinsiks – 1966

si nayn siks siks – 1966

trisi tinfornet – 3,14

tin dnu – 10%

Regra Nº 10: Pronúncia

O alfabeto skoban tem apenas 23 letras.

A B D E F G H I J K L M N the P R S T U V W Y Z

A pronúncia é igual à de qualquer língua latina. G lê-se com em gato e não como em gente.

As letras C, J e Q, são usadas apenas em nomes próprios provenientes de outras línguas.

As letras E e H tem uma função especial explicada na regra nº3. the alfabeto pronuncia-se assim: **A, Ba, Da, E, Fa, Ga...**etc.

Recapitulando:

There are three types of words in Skoban: **Basics, opposites and middle** words. A fourth type are names of places, people, companys, etc loaned from other languages

Grámatica II Construindo frases

Regra Nº 1: Ordem da palavras, verbos, adjectivos e advérbios

Muitas palavras básicas podem tanto ter the valor de nome como de adjetivo como de verbo, e por aí fora. As frases skoban têm a ordem sujeito-verbo-complemento com the adjetivo antes do nome e the advérbio antes do verbo. Por isso é fácil distinguir um verbo de um nome de um adjectivo só pelo lugar que essa palavra ocupa na frase.

ay wot kar = eu molho the carro
ay kar wot = eu transporto water
kar wot ay = the carro molha-me
wot kar ay = a water transporta-me

Mas se realmente fôr necessário usa-se the prefixo **Du**(fazer, acção) para os verbos ou os pósfixos **An**(característica) para os adjectivos e **Dlu** para os advérbios.

big – grande, grandeza
dubig – crescer, aumentar
bigan – grande
bigdlu – grandemente
dubigdlu – crescente, gradualmente

Regra Nº 2: Conjugar verbos

Para os verbos no futuro usa-se **Wil** em vez de **Du**. Para the passado, **Liw. If** significa “se” e usa-se como condicional. the pósfixo **Ing** means continuação e usa-se como gerúndio. **Gni** means “terminado”. **Mast** para the mperativo.

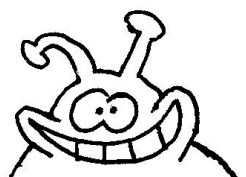

tok – fala, falar (presente, infinitivo)
dutok – fala, falar (presente, infinitivo)
tokegni– falado
wiltok – falará, vai falar (futuro)
liwtok – falava (passado imperfeito)
liwtokegni – falou (passado perfeito)
toking – falando, a falar (gerúndio)
masttok – fala (imperativo)
wiltoking – vai estar a falar
liwtoking – andava a falar, estava a falar
mastwiltoking – vais ter que estar a falar
mastliwtok – tinhas que ter falado

Be carefull with these triky verbs:

fud – food
dufud – cook
duinfud – eat
vil – death
duvil – kill
dubivil – die

some sentences:

givnodu – ensinar (**giv** dar + **no** conhecimento)
ay no wat bi givno – eu sei the que é the ensino
ay wil vigno Distok = eu vou aprender Distok
da vignoman liw tok yan = the aluno disse que sim
ay lataym if du dis = eu nunca faria isto
wat ya duing? = the que estás a fazer?
ish dugwayving ya = ele está-me a enervar (dug wayv = más vibrações)
da givnoman liwingegivno shivignoman = the professor estava a ensinar a aluna
..muvdis... vem cá

Regra Nº 3: Perguntas

As perguntas podem distinguir-se das afirmações de duas maneiras: ou porque tem a palavra “wat” ou porque terminam em “nay” ou “yan”

dis taym bi wat? – que horas são?

dris liw bi wattaym? = quando aconteceu isso?

ya ud wat? – como te chamas?

dis to fud, yan? – isto come-se?

ay kan muvin, nay? – posso entrar?

bilay aws dna bilya wat? - na minha casa ou na tua?
