

# Functions & Linear Equations

- ☆ Complete the function table for each function below. Then, graph the four points on the coordinate plane. If you follow directions, your graph should be a straight line.

Function:  $y = x - 2$

x	$y = x - 2$	y	(x, y)
1			
2			
3			
4			

Function:  $y = x + 4$

x	$y = x + 4$	y	(x, y)
-1			
0			
1			
2			

Function:  $y = .5x$

x	$y = .5x$	y	(x, y)
1			
2			
3			
4			

Function:  $y = 2x$

$x$	$y = 2x$	$y$	$(x, y)$
-1			
0			
1			
2			

Function:  $y = 3x - 1$

$x$	$y = 3x - 1$	$y$	$(x, y)$
-1			
0			
1			
2			

Function:  $y = 2x - 2$

$x$	$y = 2x - 2$	$y$	$(x, y)$
1			
2			
3			
4
