

Tarzan!

One of the best-known characters in English fiction is Tarzan, who was created in 1914. Since then, Tarzan has starred in stories, movies, and on TV. Who was the creator of Tarzan?

Answer:

$$\underline{24\frac{1}{2}} \quad \underline{3\frac{1}{3}} \quad \underline{\frac{3}{7}} \quad \underline{\frac{2}{3}} \quad \underline{4\frac{3}{4}} \quad \underline{4\frac{3}{4}} \quad \underline{\frac{3}{4}} \quad \underline{2\frac{1}{2}} \quad \underline{24\frac{1}{2}}$$

$$\underline{5\frac{3}{5}} \quad \underline{\frac{5}{8}} \quad \underline{4\frac{3}{4}} \quad \underline{4\frac{3}{4}} \quad \underline{\frac{1}{10}} \quad \underline{\frac{5}{8}} \quad \underline{\frac{3}{7}} \quad \underline{9} \quad \underline{2}$$

To answer the question, solve the equations. (Remember to simplify.) Write the letter of the problem in the space above its answer. (Some letters will be used more than once.)

A. $\frac{1}{5} \times n = \frac{2}{15}$

S. $n \times 2\frac{3}{8} = 4\frac{3}{4}$

O. $n \div \frac{1}{5} = \frac{1}{2}$

D. $n \div \frac{5}{6} = 4$

I. $n \div 3 = \frac{1}{4}$

R. $n \div 1\frac{1}{4} = 3\frac{4}{5}$

H. $n \times \frac{2}{3} = 6$

B. $n \div 4\frac{2}{3} = 1\frac{1}{5}$

U. $n \div \frac{3}{4} = \frac{5}{6}$

E. $n \div 2\frac{1}{3} = 10\frac{1}{2}$

G. $4\frac{2}{3} \times n = 2$

C. $3\frac{1}{2} \times n = 8\frac{3}{4}$
