

## Classbook- Alphabet Names

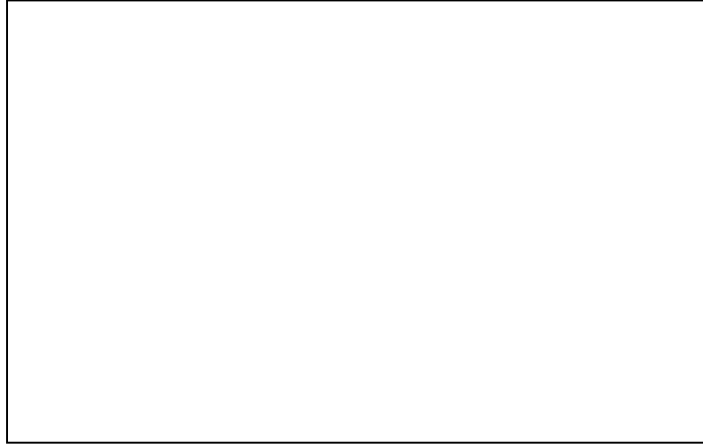

Book adaptation from A, My Name... by Alice Lyne.

This book adaptation is in two parts. The first format works well with early elementary children. The book's pattern has been changed to incorporate things that are familiar to most 1<sup>st</sup> grade children. They fill in the blanks with words and draw accompanying illustrations in the boxes.

The second version uses the exact pattern from the book. I found that most 1<sup>st</sup> grade children have difficulty with the advanced knowledge of naming places other than those they have had direct experiences. Also, picking a name for an imaginary friend is a more abstract concept that is better suited for 2<sup>nd</sup> & 3<sup>rd</sup> grade children. I have, however, used the second format at the end of the year in 1<sup>st</sup> with good success.
