

g3™
GẮC SUPERFRUIT BLEND WITH LIPOCAROTENES™

Positioning Statement

g3 is a nutrient-rich juice from the prized gắc “superfruit” of southern Asia, whose nutritional benefits have been scientifically demonstrated to protect cells. Among gắc’s potent phytonutrients are a unique and highly-bioavailable form of carotenoids called lipocarotenes™ that provide powerful antioxidant protection while supporting healthy immune function. The g3 formula was developed with 3 additional superfruits—Chinese lycium, Siberian pineapple, and cili fruit—that synergistically provide exponential benefits. g3 has a refreshing flavor that is deliciously sweet, slightly tart and can be enjoyed daily by everyone in the family.

Concept

The earth’s fruits are a demonstration of nature’s beauty and creativity. Their varied shapes, colors, perfumes, and flavors attract and inspire. More importantly, they function as natural reservoirs of life-sustaining nutrients for insect, animal, and mankind. They are particularly rich in antioxidants, vitamins, minerals, and other potent and beneficial phytonutrients.

Many fruits offer specific and targeted health benefits and can be used as important components of integrated health maintenance programs. Unfortunately, many of the current fruit juice products on the market today are not founded in science. Instead they rely heavily on anecdotal “cure-all” claims that mislead and build false hopes in consumers. Fortunately, new scientific research focused on the traditional use of specific fruits and juices for wellness benefits is beginning to separate the anecdotal and exotic from the verifiable.

g3 by Pharmanex®

Pharmanex has leveraged research and data from the Pharmanex® BioPhotonic Scanner technology to design and develop g3. Consistent with the Pharmanex® 6S Quality Process of quality and efficacy, Pharmanex is pleased to offer a unique fruit-juice blend provided by nature, time-tested through traditional use, and proven efficacious by modern science. g3 is a blend of all-natural super-

fruit juices that provide cellular rejuvenation and protection, while supporting healthy immune function, all in a highly-bioavailable form. g3 is certified to increase your Skin Carotenoid Score (SCS) with the BioPhotonic Scanner. The unique combination of phytonutrients in g3 is derived from carefully selected “superfruits” traditionally used throughout the world for their restorative properties and whose nutritional benefits have been validated through scientific study.

Natives of southern Asia have long prized the gắc fruit for its ability to promote longevity and vitality. Savoring this “fruit from heaven,” indigenous people have long believed this ceremonial fruit promotes health and wellness. Modern research shows it contains unusually concentrated amounts of a unique and highly-bioavailable form of carotenoids called lipocarotenes™. Naturally occurring long-chain fatty acids in lipocarotenes™ attract and bind important antioxidants and nutrients to facilitate their absorption, making gắc the ideal nutrient carrier.

g3 was developed with 3 additional superfruits—Chinese lycium fruit from southern China, Siberian pineapple fruit from Asia, and cili fruit from the mountains of China. The combination of these 3 superfruits along with gắc lipocarotenes™ provide exponential health benefits.

Primary Benefits

- Helps support cellular rejuvenation
- Catalytically-active—increases body’s production of SOD and Catalase
- Slows the common effects of aging through DNA protection
- SCS Certified™—improves Skin Carotenoid Score with the Pharmanex® BioPhotonic Scanner
- Fortifies antioxidant defenses against cellular free radical damage
- Supports healthy immune function
- Supports prostate health

What Makes This Product Unique?

- First to market with gấc superfruit juice
- Unique red-orange color signifies lipocarotene™ content not found in competitor products
- Great taste means all ages will enjoy and benefit each day from additional antioxidants in their diet
- Highly absorbable due to lipocarotenes

Who Should Use This Product?

g3 is the perfect complement to a diet rich in fresh fruits and vegetables, exercising, and taking LifePak®. g3 is recommended for adults and children who need to increase their servings of fruits and vegetables, are frequently exposed to free radical damage, and are interested in boosting their antioxidant network defense.

Did You Know?

- The time-tested superfruits found in g3 have many traditional uses by the indigenous people of southern Asia
- gấc pulp is used to make red rice Impwm as Xoi gấc for important celebrations, including weddings
- In traditional use, a poultice from the gấc leaf and/or seed is used to help with topical healing.

Frequently Asked Questions

Why are lipocarotenes™ important?

A lipocarotene™ is a matrix of carotenoids and fatty acids that enables efficient absorption and transport of these important nutrients. Gấc contains high levels of fatty acids, which creates a lipocarotene™ structure to deliver highly-bioavailable carotenoids. Compared to beta-carotene found in dark-green vegetables, beta-carotene from the gấc fruit appears to be more easily absorbed.

What types of carotenoids are found in gấc fruit?

Gấc fruit contains a variety of carotenoids, but lycopene and beta-carotene are the predominant carotenoids present. When comparing fresh fruits once per once, gấc contains 70 times more lycopene than tomatoes, and 10 times more beta-carotene than carrots. Not only is gấc fruit richer in carotenoids than common fruits and vegetables, but because it delivers these important antioxidants in lipocarotene form, gấc carotenoid antioxidants are better absorbed than carotenoids from common fruits and vegetables.

Is this product safe?

g3 is a safe, well-tolerated supplement. g3 contains fruit juices naturally found in the food supply, which have been consumed by Asian cultures for hundreds of years.
