

There are more than 10 tens in the picture. Going from left to right roughly in rows top to bottom:

- The batter is getting an inTENTional walk, above the...
- TEN Commandments and ...
- A-10 firing a missile, next to the
- TENor saxophone.
- Past the balloon there is a gas station atTENDant, below...
- car number 10 and above the
- soldier standing at atTENTion, which is near the
- tensegrity sphere (a collection of sticks and string where everything is in tension and nothing in compression).
- In the middle left, there is a TENT, next to the...
- octopus with its eight TENTacles and the
- flag of TENERife in the Canary Islands. (Some people saw the Roman numeral ten, which gets partial credit. Deduct a point if you thought you saw a mounTEN instead of a mountain. And, no, Apollo 10 did NOT land on the moon!)
- Further to the right there are bowling TENpins near the ...
- TEN Boom Museum in Amsterdam and
- 10 Downing St in London (good eyes).
- In the bottom section there is nothing until you get to the TENnis shoe, then you have to skip down to the right to find...
- A dollar bill that is legal TENDER for “all debts, public and private”. THREE points deducted if you thought there were ten marbles.
- No one got the ten cylinders, maybe because they were under the hood of the red Dodge Viper,
- but they did get TENnessee just below it.
- Our neighbor’s cat in our tree is not really a kitTEN but we credited those who thought so.
- And no one recognized the stripes as belonging to a lieuTENant’s uniform.

Most people were able to get ten, but to be really TENacious as instructed, you should get at least 15.
