Our Tatami factory specializes in manufacturing tatami series products, all of our equipment is shipped from Japan, and all the professional technicians have been trained in Japan.

•Our tatami is made of native good-quality straw and fine mat surface. All the products are fumigated, steamed and processed according to our special recipe.

Our elaborately produced tatami is also helpful to eliminate fatigue and refresh vigor. Our company will continue contributing to Researching, developing and Providing natural, Comfortable, healthful and high quality products to everyone all over the world!

Characteristics of Tatami room decoration:

- An unusual decoration style which is more suitable for modern people after the prevalence of luxurious decoration style in the Occident.
 - Present maximum space in minimum room.
 - Provide noble, comfortable and healthful living environment with natural materials.
- Our tatami, a real green product, is made of natural straw and igusa, without any chemical ingredient.

Product Trait

- Make your room appear much more spacious.
- Prevent spur growth, backbone crook, and rheumatism.
- Moderate hardness, anti-distortion and good durability.
- The ability to adjust the humidity indoor and radiate fragrance.

The makeup of tatami room:

Tatami floor covering:

Tatami, a green product, feeling warm in winter and cool in summer, can adjust the humidity. Its moderate hardness not only contributes to the growth of staggering and school-age children, but also is conducive to the health of waist and backbone of the middle age and old age people.
