

M&M's Minis Tube First Aid Kit or Treasure Keeper
design by Miss Sherry ~ inspired by film canister versions

Materials:

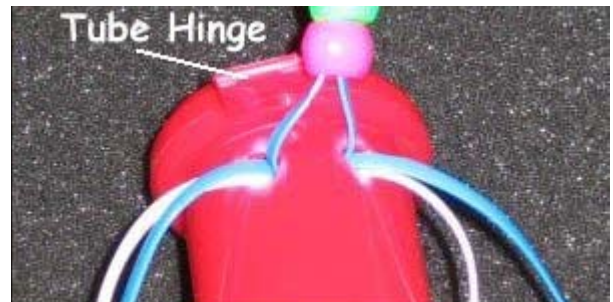

Clean M&M's Minis Tube with plastic wrapper removed
3 lengths of plastic string (we used 6", 7" and 8" lengths)
Assorted pony beads
Clip keychain

Supplies:

Scissors
Tin Punch (a thick nail or ice pick may also be used)

NOTE: An adult should prepunch the holes into the M&M's Minis tube. It is extremely dangerous for a child to do this! I used a slightly heated tin punch and gently applied pressure while twisting the tin punch into the tube to make the holes. Too much pressure will crack the tube.

1. Carefully punch two holes into the hinge side of the M&M's Minis plastic tube.
2. Thread all three lengths of your plastic string through the two punched holes from the outside of the tube.

3. Grasp both ends of single length of plastic string and pull the ends together to make the length even on both sides. Holding the ends together, string an assortment of pony beads onto the ends.
4. Tightly tie the length of plastic string you just finished stringing bead on to the clip keychain.
5. String pony beads on to the remaining lengths of plastic string and secure with a knot.
6. Decorate the tube with small stickers or permanent markers.
