

INDEX TO VOLUME 6 (Numbers 1-12) 2002

Volume 6, Number 1, 2002

CONTENTS

Practical stability of the solutions of differential-difference equations via the method of comparison and some applications to the population dynamics, I. M. STAMOVA	01
On properties of conjugate points for nonselfadjoint systems, JAHAN EFTEKHAR, RAMON NAVARRO, and BETTY TRAVIS	20
Non-linear Kronecker product Lyapunov system existence, uniqueness and sensitivity analysis, K. R. PRASAD and R. SURYANARAYANA	30
Existence results for impulsive functional differential inclusions, M. BENCHOHRA, J. HENDERSON, and S. K. NTOUYAS	47
Oscillation criteria for certain higher order difference equations, RAVI P. AGARWAL and SAID R. GRACE	60

Volume 6, Number 2, 2002

CONTENTS

Controllability results for multivalued semilinear neutral functional equations, M. BENCHOHRA & S. K. NTOUYAS	65
A new theorem for computing fixed points, IOANNIS K. ARGYROS	78
A note on the monomiality and on the operational rules of the associated Laguerre polynomials, G. DATTOLI, P. E. RICCI, and G. GIACOMOBONO	84
Convergence of Stirling's method in Banach spaces and analytic operators, IOANNIS K. ARGYROS	92
Stability theorems of perturbed linear impulsive equations, IVANKA M. STAMOVA	96
Toeplitz matrix approximation, SULIMAN AL-HOMIDAN	104

L^p - Convergence of Lagrange interpolation on an arbitrary system of nodes, D. KUMAR & H. S. KASANA	112
General auxiliary problems principle and Applications, RAM U. VERMA	121

Volume 6, Number 3, 2002

CONTENTS

Globally asymptotical stability of periodic orbits for continuous and discrete neural network models, ZHAN ZHOU	130
Partially relaxed monotone mappings in approximation-solvability of nonlinear variational inequalities, RAM U. VERMA	138
Some fundamental results on controllability, observability and realizability of first-order matrix Lyapunov systems, KANURI N. MURTY and LAURENE V. FAUSETT	147
General partial pseudomonotonicity in approximation-solvability of nonlinear variational inequalities, RAM U. VERMA	161
On a cryptosystem using simple continued fractions, GEORGE DANAS	168

Volume 6, Number 4, 2002

CONTENTS

Random approximations and random fixed points for *-nonexpansive maps, A. R. Khan and N. Hussain	174
Translation hulls of regular semigroups with inverse transversals, JIANFEI CHEN and GUANGHUI ZHU	183
Argument estimates of analytic functions involving a linear operator, J. PATEL and N. E. CHO	190
A generalization of Banach contraction principle in generalized Non-Archimedean Menger-PM-Space, RENU SINGH, SANJAY	

KUMAR, and SAVITA MALIK 204

Common fixed point mappings on Ordered Banach spaces with applications, B. C. DHAGE 210

Volume 6, Number 5, 2002

CONTENTS

On the periodic character of the difference equation, E. A. GROVE, G. LADAS. and M. PREDESCU 221

Concerning the approximation solution of linearized equations, IOANNIS K. ARGYROS 234

Existence for a boundary value problem with nonlinear boundary conditions, JEFFREY EHME 241

The linear matrix equations over a division ring, QING-WEN WANG and SHANG-ZHI LI 249

Ring congruences on common commutative regular semiring, SHANHAI LI and SHIZHENG LI 254

Volume 6, Number 6, 2002

CONTENTS

Mittag-Leffler type functions of M. Dzrbashjan, related fractional-order integro-differentiations and Laplace-type integral transforms, SVETLA P. SPIROVA, VICTOR HERNANDEZ SUAREZ, and FRANCISCO CABRERA SUAREZ 263

Some results on characterizations for certain classes of analytic Functions involving fractional calculus operators, R. K. RAINA and I. B. BAPNA 281

On the solvability of a class of vector variational inequalities (VVI) Involving G-H-KKM mappings, RAM U. VERMA 299

Dynamics of solutions to a damped wave equation in \mathbb{R}^n , MOHAMMAD AASSILA 307

Volume 6, Number 7, 2002**CONTENTS**

Mean ergodic theorems and applications to the stability of Hyperbolic PDEs, MOHAMMAD AASSILA	321
Bi(skew) symmetric and bipositive semidefinite solutions to a System of linear matrix equations over division rings, QING-WEN WANG, AI-YUN WANG and SHANG-ZHI LI	333
On a generalization of 2-normed linear space, T. G. CHEN	340
Some constructions of twisted-Hopf algebras, JIA-HUA SUN and SHANG-ZHI LI	354
A two point boundary value problem for a third order differential Equation, JOHNNY HENDERSON and ANA MARIA TAMERU	361

Volume 6, Number 8, 2002**CONTENTS**

Existence theorems for nonlinear functional boundary value problems, B. C. DHAGE and S. K. NTOUYAS	380
On some Kloosterman sums, GEORGE DANAS	391
On complete noncompact submanifolds with finite total curvature, YI-BING SHEN	404
Generalized strongly pseudomonotone nonlinear variational inequalities and general proximal point methods, RAM U. VERMA	417

Volume 6, Number 9, 2002**CONTENTS**

Structure of idempotent semiring which satisfies the identity $ab+b=a+b$, XUAN ZHANG and SHIZHENG LI	428
On an existence theorem for Urysohn integral equations via measure of noncompactness, A. A. EL-BARY, M. A. DARWISH, and W. G. EL-SAYED	441

Linear and bilinear generating functions involving Gould-Hopper polynomials, M. I. QURESHI, YASMEEN, and M. A. PATHAN	449
A study of a new class of polynomial set suggested by Gegenbauer polynomials, MUMTAZ AHMAD KHAN and ABDUL RAHMAN KHAN	457
Average growth and total permanence, SHAIR AHMAD and ALAN C. LAZER	473

Volume 6, Number 10, 2002

CONTENTS

On certain families of analytic functions with negative coefficients involving operators of Fractional Calculus, R. N. KALIA and R. K. RAINA	475
Bornological properties of the space of entire functions, MUSHTAQ SHAKER and G. S. SRIVASTAVA	486
On the Ehrenfest Paradox, VASIL G. ANGELOV	500
The number of irreducible elements in \mathbb{Z}_n , A. N. EL-KASSAR and BADRIÉ KOJOK	515

Volume 6, Number 11, 2002

CONTENTS

Extensions of some twisted bialgebras, JIAN-HUA SUN and CHUN-YAN LIN	520
Upper and lower solutions method for first order discontinuous differential inclusions, B. C. DHAGE and S. M. KANG	527
Global Existence and decay of solutions to a system of Petrovsky, SALIM A. MESSAOUDI	534
A practical method for finding the general solution to a system of linear matrix equations over an arbitrary division ring, QING-WEN WANG and SHANG-ZHI LI	542

A fixed point theorem with applications to differential equations in ordered Banach Spaces, B. C. DHAGE	548
--	-----

Volume 6, Number 12, 2002**CONTENTS**

On the asymptotic behavior of the difference equation $x_{n+1} = x_n [a - F(x_{n-1})] F(x_{n-2})$, GEORGE KARAKOSTAS	558
Higher order asymptotic expansions for singularly perturbed coupled boundary value problems, LUMINIȚA BARBU	573
On $f_{\lambda,\mu}(3,1)$ -structure manifold, RAM NIVAS, LOVEJOY S. DAS, and VIRENDRA NATH PATHAK	582
Index to Volume 6 (1-12) 2002	589
