

# Contents

<b>Introduction</b>	ix
<b>PART I</b> Inadequacy of the Current Paradigm	
<b>1. Permittivity and Permeability Constants of Vacuum</b>	<b>1</b>
1.1 Physical Units and Dimensional Analysis	1
1.2 Dimensionality of $\epsilon_0$ and $\mu_0$ Constants	3
1.3 Significance of Dimensional Constants	4
1.4 Significance of Permittivity and Permeability Constants	5
<b>2. Empty Space, Aether and Vacuum</b>	<b>7</b>
2.1 The Coordinate Space	7
2.2 The Physical Space	8
2.3 Notion of Aether, Vacuum or Quantum Vacuum	8
2.4 Physical Properties of Vacuum or Aether	9
2.5 Detection of Aether, Vacuum or Elastic Space Continuum	11
<b>3. Inertial Property and Time Measurements</b>	<b>13</b>
3.1 Notion of Inertia	13
3.2 Dynamic Mass	14
3.3 Notion of Time	15
3.4 Cyclic Natural Phenomena	15
3.5 Cyclic Changes and Measure of Time	16
<b>4. Absolute Reference Frame</b>	<b>19</b>
4.1 Valid Coordinate Reference Frames	19
4.2 International Celestial Reference System	20
4.3 Critical Observations on Relativity Principle	21
4.4 Relative Measurements	23
<b>5. Detection of the Universal Reference Frame</b>	<b>25</b>
5.1 Notion of Universal Reference Frame	25
5.2 Experimental Set up	26
5.3 The Experimental Technique	27
5.4 The Result	30
<b>6. Invalidity of the Special Theory of Relativity</b>	<b>33</b>
6.1 Special Principle of Relativity	33
6.2 Invalidity of the Special Principle of Relativity	33
6.3 Invalidity of the Second Postulate	37
6.4 Shift in Viewpoint	39
<b>7. Representation of Continuum Strain &amp; Stress</b>	<b>41</b>
7.1 Basic Concepts Associated with Strain	41

FUNDAMENTAL NATURE OF MATTER AND FIELDS

7.2	Deformations in Continuous Media	43
7.3	Representation of Infinitesimal Strain – Strain Tensor	44
7.4	Representation of Infinitesimal Strain – Modified Metric	45
7.5	Stress Tensor in an Elastic Continuum	48
<b>8.</b>	<b>Fallacious Notion of Spacetime Continuum</b>	<b>51</b>
8.1	The Notions of Space and Time	51
8.2	Particle Traces	52
8.3	Physical Entity	53
8.4	Space-time: 4-D Block or a Trace of 3-D Space?	54
8.5	Basic Objectives of the Spacetime Model	57
8.6	Spacetime manifold as a Graphical Template	58
<b>9.</b>	<b>Invalidity of General Theory of Relativity</b>	<b>61</b>
9.1	Spacetime Continuum & Postulate of General Relativity	61
9.2	Line element ‘ds’ and the Space Metric	62
9.3	From Euclidean Space to Riemannian Space	63
9.4	Deformed State of the Space Continuum	64
9.5	Gravitation Induced Metric & Associated Strain Tensor	65
9.6	Incompatibility of the Induced Strain Components	66
9.7	Physical Invalidity of General Theory of Relativity	67
<b>10.</b>	<b>Uncertainty &amp; Potential Energy in QM</b>	<b>69</b>
10.1	Wave Particle Duality	69
10.2	Bohmian Mechanics	70
10.3	Statistical Interpretation of the Wave Function	70
10.4	Statistical Notion of Uncertainty in QM	71
10.5	Schroedinger's Equation for Free Particle	72
10.6	Notions of Kinetic, Potential and Total Energy	75
10.7	Schroedinger's Equation with Wrong P.E. Term	77
10.8	Consequential Errors in Established Solutions	78
<b>11.</b>	<b>The Hydrogen Orbitals</b>	<b>83</b>
11.1	Orbital motion of an Electron around a Proton	83
11.2	Dynamic Orbital Parameters	86
11.3	Photon Emission - General Conditions	89
11.4	Orbital Transition Parameters	91
11.5	Summary & Conclusion	94
<b>12.</b>	<b>MMX: A New Hypothesis on Photon Emission</b>	<b>95</b>
12.1	M M Experimental Setup	95
12.2	Null Result of M M Experiment	100

12.3	Flaw in the Interpretation of MMX Null Result	101
12.4	A New Hypothesis on Emission of Photons	103
12.5	Explanation of the Null Result of MM Experiment	104
<b>13.</b>	<b>The Standard Model of Particle Physics</b>	<b>107</b>
13.1	Elementary Particles	107
13.2	Standard Model of Elementary Particles	109
13.3	Exchange Theory of Interactions	110
13.4	Inadequacy of the Standard Model	111
	<b>PART II Space Dynamics to Particle Structures</b>	<b>113</b>
<b>14.</b>	<b>Dynamics of the Space Continuum</b>	<b>115</b>
14.1	Space-time Distortions or Space Dynamics	115
14.2	Localized Regions under Dynamic Strain	117
14.3	Strain Bubble representing Electron Structure	120
14.4	Photon Wave Packet as a Propagating Strain Bubble	121
<b>15.</b>	<b>Equilibrium Equations in Elastic Space Continuum</b>	<b>123</b>
15.1	Introduction	123
15.2	General Equations of Elasticity in an Elastic Continuum	124
15.3	Stress Strain Relations in the Elastic Space Continuum	130
15.4	Equilibrium Equations in Different Coordinate Systems	131
<b>16.</b>	<b>Strain Waves and the Electro-Magnetic Field</b>	<b>135</b>
16.1	Strain Wave Propagation in Elastic Space Continuum	135
16.2	Inertial Property of the Space Continuum	136
16.3	Electromagnetic Field in the Elastic Space Continuum	136
16.4	Energy Density in the Strain Fields	138
<b>17.</b>	<b>Solutions of Equilibrium Equations</b>	<b>141</b>
17.1	Constraints on Solution of Equilibrium Equations	141
17.2	Strain Bubbles in the Elastic Space Continuum	142
17.3	Typical Solutions Representing Strain Bubbles	146
17.4	Kinetic Energy of Strain Bubbles and QM	152
<b>18.</b>	<b>The Electron Structure and Coulomb Interaction</b>	<b>155</b>
18.1	Spherically Symmetric Strain Bubbles	155
18.2	The Electron Structure	157
18.3	Coulomb Interaction	161
18.4	Salient Parameters of the Electron	167
<b>19.</b>	<b>The Photon Wave Packet and Neutrinos</b>	<b>169</b>
19.1	Equilibrium Equations in Cartesian Coordinates	169

FUNDAMENTAL NATURE OF MATTER AND FIELDS

19.2	The Electromagnetic Field	169
19.3	The Photon	171
19.4	The Neutrinos	173
<b>20.</b>	<b>Nucleon Structure and Strong Interaction</b>	<b>177</b>
20.1	Cylindrically Symmetric Strain Bubbles	177
20.2	The Nucleon Core	179
20.3	Strong Interactions	182
20.4	The Proton	193
20.5	The Neutron	198
20.6	The Proton Neutron Bonding	200
<b>21.</b>	<b>Stable and Unstable Elementary Particles</b>	<b>203</b>
21.1	Strained State in the Elastic Space Continuum	203
21.2	Strain Bubbles or Elementary Particles	203
21.3	Stability Criteria for Elementary Particles	204
21.4	Unstable Elementary Particles	206
<b>22.</b>	<b>Fundamental Nature of Gravitation</b>	<b>207</b>
22.1	Current Theories of Gravitation	207
22.2	Coulomb Interaction and Electrostatic Field Energy	209
22.3	Ripple Wave Field Energy of Atoms and Molecules	211
22.4	Gravitation as a Ripple Wave Field Interaction	211
22.5	Physical Mechanism of Newtonian Gravitation	212
<b>23</b>	<b>Summary: Call for a Paradigm Shift</b>	<b>215</b>
23.1	Current Paradigm	215
23.2	The New Paradigm	217
23.3	Matter Particles and Fields	218
