

This is the paper on General aptitude. This paper is very very important as far as one's selection is concerned. You have to be very fast and accurate and you have to score at least above 80 to be selected for interview. The criteria for the test was 60% throughout in 10th, 12th, grad and MCA up to IV sem. Here about 150 students sat for the test and 15 were shortlisted for the interviews. So you can see the degree of the competition. The company is good and work hard you can get through. Start practising Mental ability from RS Agarwal Specially PUZZLES, NUMBER SERIES, MIRROR IMAGE, 3D and FIGURE SERIES. Though I am sending you the technical paper also but that will be available to almost all of you and so that is not so important for selection. Just attempt about 60 questions out of 75 in that paper.

### GENERAL ABILITY - REASONING

NO of ques : 100

Time : 40 minutes

This paper was divided into 7(seven) sections:

1. Sequence figures : 10 questions

In this section you have to trace out the next figure in the given sequence OR find out the ODD figure from given four figures.

very simple section and you can do it very easily.

This is

2. Numerical Series : 15 questions

In this section you have to find the odd no in given series OR find the next no in the given series OR what comes in place of ? in a series.

Practice this type of question from R.S Agarwal. I remember only few questions which I am trying to give below:

6 9 12 ? 6

6 ? 9 9 6

9 12 6 3 6

this is just the type of ques. It may not be the one. You see that the sum of each row is 36.

exact

So ?=6. There were many questions of this type.

3 6 18 ? 7 8

1 2 6 6 3 2

This type of questions were there which you have to find the no replacing ?....

in

3. Non verbal reasoning : 15 questions

Here U are given 4 squares figures (a,b,c,d)  
differing slightly in thickness of their sides  
Now U are given a few set of figures with some  
figures left out. These blanks are numbered 1 to 15. U  
have to fit one of the above given square figures in each blank. This is a  
very simple question and U can do it easily.

#### 4. Analytical Reasoning : 15 Questions

This section contained questions as given in puzzle  
section of RS Agarwal. It contains 4  
parts with 5, 5, 3, 2 questions. Just do it with  
patience. Make tables and then U will easily answer the questions  
following it..

I don't remember the exact question but I am sending  
approximately same question:

(i). Four friends are given named Akansha, Anuska, Anisha,  
... , ... . Each of them live in a separate home and  
sleep on one bed. Akansha and Anuska have two extra beds, two of  
the house have green lawns while the rest have narrow porches. One of the house has  
Airconditioner while the rest have fans. And so on..

Based on these informations five questions were asked like

What is the total no of beds in all houses?

ans: 14 (not sure!! just check it)

Who lives in the house with green lawn and with AC?

These type of questions are very simple. Just make the table and  
U will get all the answers

(ii). Five students and five subjects are given along with few  
information. Five questions are asked following the questions. This is a bit tricky do  
it in the end.

(iii). In a given knockout series England defeated  
Pakistan, Pakistan was defeated by Newzealand,  
India defeated both England and Newzealand.  
Three very simple questions were asked like:  
Who won the series? ans: India  
Who didn't win a single match? ans: Pakistan  
How many matches were played in total?

(iv). This is also very simple question.. U can answer it easily.

#### 5. Spatial reasoning : 15 Questions

This question is similar to the MIRROR IMAGE  
part of RS Agarwal. A Figure is given and U have to identify the  
figure which "CANNOT BE" the mirror image of the given figure which  
can be rotated along any axis.

6. English aptitude : 15 Questions

This section contains two parts:

(i). 5 questions asking synonym of given words.

(one of the word is quiet ans:silent)

(ii).10 questions asking to identify words not similar in meaning to the given words.

(one of the word is mutiny and the alternatives are a)uprising b)rebel c)revolt,d).... answer:b )

7. 3D reasoning : 15 Questions

This section contained questions in which a 3 dimensional figure is given and U have to judge how it would look from the side indicated in the question like from below,from back etc.

Also there are questions in which a sheet is given with marks on it along which it can be folded.U have to judge from the given option the three dimensional structure which can be build by folding the sheet along the given lines .
